

# Emerson Model Number Explanation

## Emerson Model System

<b>K</b>   <b>1). TYPE OF ELECTRICAL MOTOR</b> F: Shaded Pole K, KA or KO: Permanent Split Capacitor T or KK: Capacitor Start/ Capacitor Run C, CA or KS: Capacitor Start P: Polyphase SA, S: Split Phase R or RK: Resistance Start/ Capacitor Run	<b>55</b>   <b>2). EMERSON FRAME NUMBER</b> Determined by the diameter of stator lamination. In other words, 55 designates 5.5" diameter, 48 designates 4.8" diameter and 63 designates 6.3" diameter. This is the diameter of the stator laminations and does not include the added thickness of the frame band.	<b>HX</b>   <b>THERMAL PROTECTOR DESIGNATION</b>	<b>MPH-1298</b>   <b>3). SEQUENCE NUMBER</b> Letters and numbers for a particular motor model are unique
---	--	--	---

Sort order of the tables

## Thermal Protection Designators

If two letters appear in this location and they are one of the following combinations:

- If no letters appear, the motor has no internal thermal protector.
- CX, EX, JX, NX, VZ, SX, WX, YX, ZX, AY, EY, HY, JY, MY, NY, PY, TY, XY, JZ, MZ, or UZ, the motor includes an integral thermal protector of the automatic reset type, and the motor-protector combination is UL recognized for locked-rotor and running-heating protection.
- BX, FX, KX, BY, GY, KY, AZ, CZ, or FZ, the motor includes an integral thermal protector of the manual reset type, and the motor-protector combination is UL recognized for locked-rotor protection and running -heating protection.
- MX, PX, RX, TX, VX, DY, LY, NZ, PZ, or RY, the motor includes an integral thermal protector of the automatic reset type and the motor-protector combination is UL recognized for locked-rotor protection only.
- UX, SZ, TZ, or EZ, the motor includes an integral thermal protector of the manual reset type, and the motor-protector combination is UL recognized for locked-rotor protection only.
- HX, LX, FY, SY, UY, VY, WY, YY, ZY, GZ, RZ, or KZ, the motor includes an integral thermal protector of the automatic reset type, and the motor-protector combination is UL recognized for locked-rotor and no-

- load no-air-over running-heating protection.
- BZ, DZ, HZ, or LZ, the motor includes an integral thermal protector of the manual reset type, and the motor-protector combination is UL recognized for locked-rotor and no-load no-air-over running-heating protection.
- Furthermore, of the above letters, the combinations PY, SY, TY, UY, VY, WY, AZ, BZ, CZ, MZ, NZ, SZ, or DZ, indicate a motor-protector combination which meets UL requirements for a 3-phase motor-protector when connected to a wye-delta or delta-wye transformer under conditions of primary single-phasing.
- WZ, the motor is a UL recognized component motor and includes a temperature sensor which controls an external circuit.
- XZ, the motor is not a UL recognized component motor and may or may not be provided with a thermal protector.
- YZ, the motor is a UL recognized component motor which includes an integral thermal protector or the manual reset type, but the motor-protector combination is no UL recognized.
- ZZ, the motor is a UL recognized component motor which includes an integral thermal protector of the automatic reset type, but the motor-protector combination not UL recognized.

## MODIFICATION / COMMENT CODES

1. Horsepower of replacement motor increased to meet OEM motor torque requirements.
2. Replace or add capacitor as specified in motor catalog.
3. Motor rated 2 speed, 4 speed, or 5 speed replace with 3 speed.
4. Replacement motor is reversible.
5. Replacement is mechanically reversible.
6. Sleeve bearing replaced with ball bearing.
7. Cut shaft to required length.
8. Voltage variation.
9. Original open motor replaced with enclosed motor.
10. Replacement motor requires stud relocation.
11. Single speed motor replaced with multi-speed.
12. Shell length is different on OEM. Check motor catalog for length of replacement motor.
13. Replacement motor supplied with hub rings.
14. Replacement motor supplied with hubs only.
15. Replacement motor is totally enclosed.
16. No outlet box supplied.
17. Enclosed motor replaced with shaft end only enclosed motor.
18. Shaded pole motor replaced with permanent split capacitor motor.

## GENERAL COMMENTS:

- A. Lead color of replacement may not match original. Consult OEM's wiring information.
- B. Replacement motors may require that leads be cut or that additional lead material be added to match the original equipment length.
- C. For kit information refer to the current Emerson Motor Catalog.
