

NSK S1™ Series Precision Linear Guides

Series of interchangeable products enables fast delivery.

A new guide way system for machinery ensures environmental compatibility and high performance. Its quiet, smooth operation is friendly to both the workplace and the environment.

Patent Pending

The NSK S1™ Series meets the demand for smoother, silent motion

The popular series has been updated and expanded into a complete lineup with a new series of interchangeable products!

The NSK S1™ Series Linear Guide features resin retainers between the balls to prevent collision and rubbing.

Ball groove construction is standard in the LH and LS Series.

Feature 1 Lower noise and gentler tone

Incorporating a retainer piece and optimizing the circulation path enables steel ball circulation stability and the prevention of ball collision, resulting in noise reduction by 5 dB (A) or more than that of conventional NSK products. In addition, contributing to sound improvement (human-friendly sound quality) with lower noise levels, especially in the high-frequency range.

Lower noise and gentler tone

Fig. 1 Noise level comparison between LH30 and SH30

Fig. 2 Noise level comparison between LS20 and SS20

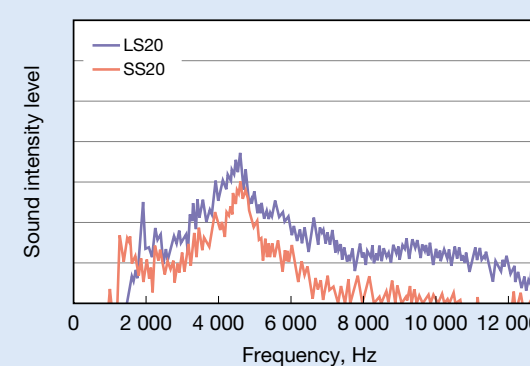

Fig. 3 Noise level comparison between LS20 and SS20

Test conditions: Oil lubrication (VG68)
Locate a microphone at 500 mm above the sample (both for LH30 and LS20)

*Noise level depends on the microphone location.

Noise level drops by approximately 6 dB (A) when the distance from the microphone is doubled.

NSK S1™ Series Precision Linear Guides

Feature 2 Smoother motion

Improved steel ball circulation stability, free of interference between the balls improves dynamic friction characteristics, resulting in smooth and stable motion, which is especially effective for low speed motion.

Smoother motion

Feature 3 Low dust generation

A resin retaining piece, which prevents steel balls collision, features effective low dust generation characteristics compared to conventional products.

Remarkable low dust generation

Feature 4 Fast delivery

Lineup of interchangeable rails and ball slides in the series supports random matching and facilitates fast delivery.

1. Accuracy

The preloaded assembly types products have four accuracy grades; Ultra precision P3, Super precision P4, High precision P5 and Precision P6, while the interchangeable types have a regular class PC.

Table 1 shows the accuracy standard for the preloaded assembly type of the SH Series and SS Series, while Table 2 shows the accuracy standard for the interchangeable types.

Table 1 Accuracy grade for the preloaded assembly type

2. Preload and rigidity

We offer three levels of preload: Medium preload (Z3), Slight preload (Z1) and Fine clearance (Z0), along with interchangeable types of Fine clearance

(ZZ). Values for preload and rigidity of the SH and SS Series are shown in Tables 4 and 5.

Table 4 Preload and rigidity of the SH Series

Model		Preload (N)		Rigidity (N/μm)

3.2 Reference number for single bearing of interchangeable types

3.3 Reference number for single rail of interchangeable types

4. Application examples

- Applications that require lower noise levels and a lower level of vibration
Instruments, printers, medical equipment, office machines, etc.
- Applications that require smoother motion
Electric wire cutting discharge machines, scanners and pattern generators and steppers.

Handling Precautions

1. Temperature range Maximum operating temperature: 50°C
Maximum momentary temperature: 80°C
2. Usage conditions We recommend using “NSK S1™ Series” products in a clean environment in order to utilize their full range of capabilities.
3. Handling of interchangeable types
 - ① Interchangeable ball slide will be delivered with a provisional rail (inserting fixture).
 - ② Do not remove the ball slide from provisional rail until inserting into a rail.
 - ③ Be sure to use the provisional rail when removing ball slide(s) form a rail.

SS-AL (High load type) / SS-CL (medium load type)

Reference number

Example: **SS 30 1000 AL C 2 - * PC Z**

Series name: SS
 Size: 30
 Rail length (mm): 1000
 Ball slide shape/height: AL
 Material/surface treatment: C (Special carbon steel (NSK standard))
 K: Stainless steel
 Preload: Z
 Accuracy grade: *
 Design serial number: PC
 Number of ball slides per rail: 2

Reference number for rail of interchangeable types

For regular rails (non-jointed rail)
 Example: **L 1 S 15 1000 T S Z**

Interchangeable rail: L
 Series name: S
 Size: 15
 Rail length (mm): 1000
 Preload: Z
 S: Stainless steel
 No code: Special carbon steel (NSK standard)
 Applicable only to L1S15 (no code for other sizes)
 T: With M4-bolt holes for rail mounting
 No code: With M3-bolt holes for rail mounting

For more details regarding joint rails, please contact us.

Reference number for ball slide of interchangeable types

Example: **S A S 30 AL S Z**

Interchangeable bearing: S
 Series name: A
 Size: S
 Preload Z: Slight preload
 S: Stainless steel
 No code: Special carbon steel (NSK standard)
 Ball slide shape/height: AL
