WITHSTANDS FREQUENT WASHDOWNS RESISTING

- Corrosion
- Detergents
- Chemicals

STAINLESS STEEL

- Grease nipple
- Bolt hole liners
- Set screws
- Flinger
- Seal core
- Bearing rings, cage and balls

THERMOPLASTIC MOULDED HOUSING

- No coating
- No cracking
- No peeling
- Solid base

RHP SILVER-LUBE®

- CORROSION RESISTANT UNITS
- STAINLESS STEEL BEARING INSERTS
- EFFECTIVE, EFFICIENT SEALING
- APPROVED FOOD GRADE GREASE
- WIDE OPERATING TEMPERATURE
- END COVERS AVAILABLE

INTRODUCTION

The RHP Silver-Lube® series is a range of corrosion resistant bearing units specifically for use in industries where frequent thorough washdowns are necessary, optimum hygiene standards are required and good chemical resistance is important over a wide temperature range.

The units are available in pillow block, two-bolt flange, four-bolt flange and take-up unit configurations and are capable of accommodating initial misalignment from mounting errors. In operation the units have proven reliability in the most hostile applications.

Relubrication is possible for long trouble-free life, minimising maintenance, maximising productivity and helping maintain hygiene standards.

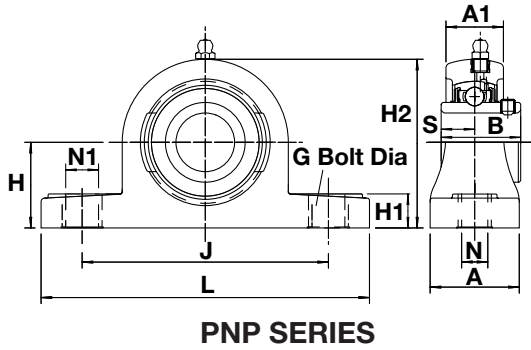

Silver-Lube® housings are made from PBT thermoplastic resin which, in addition to being non-corrodable, is resistant to detergents and a wide range of chemicals. The housings are paint and coating free which prevents chipping or flaking and have smooth surfaces to assist thorough washdowns.

Silver-Lube® bearing inserts are made from stainless steel, are provided with effective, efficient sealing arrangements and are charged with an aluminium complex, high temperature approved food grade grease, as standard.

Full technical specifications, application details and descriptions of the Silver-Lube® range are provided within this document.

FROM BOTTLING PLANTS TO FISHERIES

UNIT DIMENSIONS

Silver-Lube® mounting details are dimensionally interchangeable with the traditional RHP Self-Lube® range. However, some non-critical dimensions do differ, see tables below.

For permissible bearing speeds, please see page 14.

END COVERS

Polypropylene end covers are available to fit all Silver-Lube® housings. End covers can be used at temperatures ranging from -20°C to $+90^{\circ}\text{C}$. They may be used as additional protection for the bearing in adverse environmental conditions as well as an aid to meeting safety requirements.

HOUSING STRENGTH

Housing load carrying capacity varies depending on the application loading regime, which may be intermittent, continuous or cyclical. Maximum housing loads are given in tables 10, 11, 12 and 13. These loads must not be exceeded without prior consultation with NSK.

Published housing maximum load capacities do not allow for any reduction in housing strength caused by exposure of the housing to chemicals, water, steam, heat, ultraviolet light or any combination of these factors. If any of these factors are present in the application the designer or end-user must establish the effect of these exposures and reduce the published maximum housing load accordingly.

To maximise load carrying capacity it is recommended that washers are used with the fixing bolts. Tables 10, 11 and 12 also detail maximum fixing bolt tightening torques.

Note that there is no Maximum Fixing Bolt Torque applicable for Take-Up Units.

STATIC ELECTRICITY GENERATION

Static electricity may be generated by Silver-Lube® bearing units under certain application conditions.

Silver-Lube® bearings are therefore not recommended for use in explosive or flammable environments. If Silver-Lube® bearing units are used in flammable or explosive applications the bearing insert must be earthed.

FROM FOOD TO PHARMACEUTICALS

SILVER-LUBE® BEARING INSERTS

The grease in this product is an aluminium complex food grade grease. In the event of relubricating being necessary, this type of grease is the first choice replacement. Please note that Silver-Lube® bearings were previously charged with Chevron Poly FM2 grease, which is incompatible with the current aluminium complex food grade grease.

Original Chevron greased inserts can be identified by there being only three markings on the flinger, for example: 'RHP JAPAN J1025-25GCR'. Inserts charged with an aluminium complex food grade grease can be identified by the presence of an additional letter between RHP and Japan; for example inserts are marked with a 'K' (or 'M') to give 'RHP K JAPAN J1025-25GCR'.

If an aluminium complex food grade grease is not available, it is essential that any alternative grease is USDA H1 approved and ideally chemically compatible with the original grease. If chemical compatibility cannot be assured, then it is recommended that the original grease is completely flushed out from the system before relubrication. NSK should be consulted if necessary.

INSERT DESIGNATIONS, DIMENSIONS AND WEIGHTS

AISI/ASTM	AISI440C	AISI440C	AISI304	AISI410	AISI304

SHAFT TOLERANCES AND PERMISSIBLE SPEEDS

Bearing insert permissible speed is dependent on shaft tolerance.

For higher speed applications an ISO h7 shaft tolerance is recommended. An ISO h9 shaft tolerance may be used for low speed applications. For more details see table 16.

Table 16

Tolerances and Speeds

BASIC BEARING INSERT	BEARING LIMITING SPEED (RPM)	ISO h7		BEARING LIMITING SPEED (RPM)	ISO h9	
		SHAFT TOLERANCE HIGH (0.001 mm UNITS)	SHAFT TOLERANCE LOW (0.001 mm UNITS)		SHAFT TOLERANCE HIGH (0.001 mm UNITS)	SHAFT TOLERANCE LOW (0.001 mm UNITS)
J1020	2900	0	-21	1490	0	-52

J1040	1650	0	-25	830	0	-62

SET SCREW TIGHTENING TORQUES

Set screws for Silver-Lube® bearing inserts are manufactured from stainless steel and can fracture if overtightened. The limiting set screw torques listed below should not be exceeded.

Table 17

Tightening Torques

RHP DESIGNATION	SET SCREW	MAXIMUM TIGHTENING TORQUE (Nm)
J1020-20GCR	M6 x 7.0 LONG	4
J1020-3/4GCR	M6 x 7.0 LONG	4
J1025-25GCR	M6 x 7.0 LONG	4
J1025-1GCR	M6 x 7.0 LONG	4
J1030-30GCR	M6 x 7.0 LONG	4
J1030-1.3/16GCR	M6 x 7.0 LONG	4
J1030-1.1/4GCR	M6 x 7.0 LONG	4
J1035-35GCR	M8 x 9.0 LONG	8
J1035-1.1/4GCR	M8 x 9.0 LONG	8
J1035-1.7/16GCR	M8 x 9.0 LONG	8
J1040-40GCR	M8 x 9.0 LONG	8
J1040-1.1/2GCR	M8 x 9.0 LONG	8

BORE TOLERANCE

Silver-Lube® inner ring bore tolerances are on the plus side of the nominal bore. This enables the bearing to slip freely over standard shafting.

Table 18

Bore Tolerances

NOMINAL BORE DIAMETER d (mm)		BORE TOLERANCE (0.001 mm UNITS)	
OVER	INCLUDING	MAX	MIN
10	18	+15	0
18	30	+18	0
30	50	+21	0
