RENOLD

Strength through Service

Renold Gears has been manufacturing high quality, high specification gear units for over 100 years and has always been at the leading edge of gear technology with innovative products and power transmission solutions.

Interchangeability

Many of the products from Renold Gears are dimensionally interchangeable with other manufacturers gear units, allowing a trouble free replacement of gearboxes, in most cases upgrading the capacity through state of the art technology and materials.

Custom Made

Renold Gears is unique in it's ability to offer custom made products designed to meet customers exacting requirements without compromise on availability and cost. From complete package solutions to individual precision replacement gears, all can be tailor made to meet specific applicational requirements.

Available

The most popular ranges of gearboxes are available from local distribution stock, backed up by extensive stocks from our manufacturing plant in the UK.

Gearflex

Renold Gearflex consists of both standard ranges and customised special all metal couplings, giving maximum power capacity within minimum space envelope and excellent misalignment capacity.

Coupling capacity

- Maximum power @ 100RPM: 50485kW
- Maximum torque: 4747000Nm

Features and benefits

- All carbon steel heavy duty gear coupling for strength in application, combined with long life.
- AGMA standard (DA/SA ranges) - interchangeable and cost effective.
- Single and double engagement types available, suiting all applicational requirements.
- Crowned and barrelled teeth for optimum contact and long life.
- Customised options available for all gearflex ranges to give design suitability for demanding applications.
- High misalignment up to 6°

Range options

- A series AGMA standard double and single engagement
- B series heavy duty standard double and single engagement
- D series high misalignment double and single engagement
- V series vertical
- NTS high speed
- A series double engagement flanged spacer (DAFS)
- A series double engagement carbon shaft
- Brake Disc/Drum
- Dis-engaging
- Long Hub
- Croft MB Series
- Mill Motor
- Shear Pin
- Telescopic

Applications

- Crane drives
- Mining
- Steelworks
- General heavy industrial applications

Construction details

Medium carbon steel half bodies and inner hubs.

'O' Ring sealing (A series)

Lip seals (D series)

Standard Gearflex products DA, HDB, SA, HSB and NTS can be certified for use in potentially explosive atmospheres containing gas or dust, according to ATEX directive 94/9/EC. The couplings are classified for equipment group II, categories 2 and 3.

Special conditions apply. Contact Renold for further details, or for consideration of ATEX certification of other Gearflex products.

Misalignment capabilities:

Double Engagement types

- Parallel Offset
- Angular
- Axial (End Float)

Single Engagement types

- Angular
- Axial (End Float)

Designed to meet the demands of today's wide ranging applications and manufactured to Renolds high standards.

Renold Gearflex Couplings feature an increased tooth capacity from optimised design, providing maximised power capacity within a given space envelope.

Contact us for more information on how we can deliver a cost effective solution to your application.

RENOLD Clutches & Couplings have the design and manufacturing capability to engineer a shaft coupling to suit customers special design application requirements.

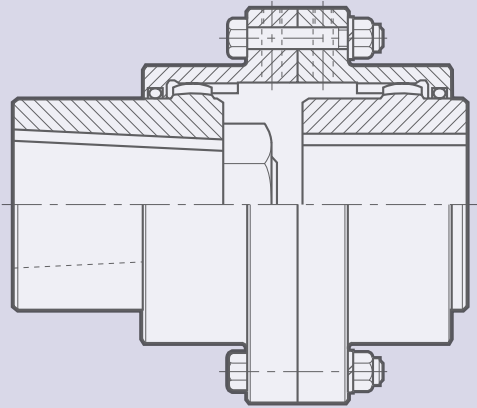

Note: Croft MB series are also readily available in all variants. For details contact Renold.

When used in conjunction with a cardan shaft, two single engagement couplings will accept offset misalignment.

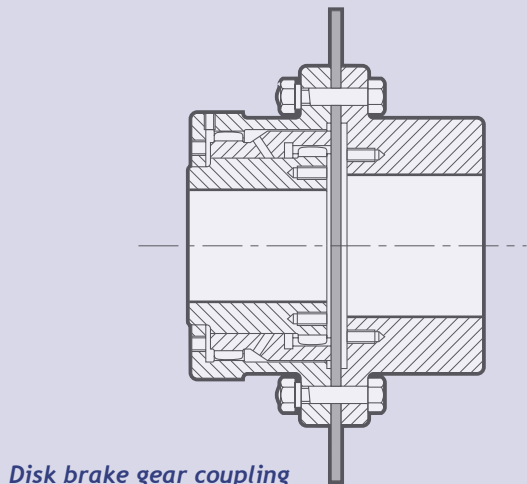

The amount will be dependant upon the cardan shaft length.

Adapted and Custom Gear Couplings

Mill motor gear

Disk brake gear coupling

Shear pin gear coupling

Disengaging type gear coupling - standard series

Telescopic type gear coupling - standard series

Misalignment angle per half (degrees)	Rating factor
1.50	1.00
1.00	1.15
0.75	1.30
0.50	1.55
0.00	2.00

Catalogue ratings shown are nominal values at 1.50 degrees.

For values at misalignments less than 1.50 degrees:-

Multiply nominal catalogue values by factor in table left.

e.g.

GF60DA at 1.50° = 104668 Nm

at 0.75° = 104668 x 1.30:-

GF60DA at 0.75° = 136068 Nm

Long hub versions available. Contact Renold for details.
See key stress calculations on page 13.

* Maximum Bore - The maximum bores shown are absolute maximums.
Under normal circumstances the boss to bore ratio should not be less than 1.5 for standard applications.
Consult Renold for overbore approval.

** Speed in excess of these shown may require additional balancing.

*** Hubs may be reversed to increase DBSE (F2 + F3 above). If axial movement is allowed with both hubs reversed, a stop plate should be fitted to prevent hubs disengaging from outers.

Ordering code

Gearflex High Misalignment D series Double Engagement type DD

D Series Double Engagement couplings accommodate offset, angular or combined misalignment.

Universally used for connecting industrial applications that are subject to higher than standard misalignment of the Gearflex DA, such as oil field equipment and rolling mill drives.

Induction hardened gear teeth and lip type seals handle up to 6° of misalignment.

Coupling size	Torque rating Nm	Bore A Max* mm	Dimensions										Mass kg	WR ² kg m ²	Offset (parallel)

* Maximum Bore - The maximum bores shown are absolute maximums. Under normal circumstances the boss to bore ratio should not be less than 1.5 for standard applications. Consult Renold for overbore approval.

Specify misalignment angle ± 3.5° or ± 6°.

Gear Teeth are induction hardened.

Shrouded bolt flanges available if required.

Offset capacity is dependant on shaft length, please consult Renold for max permissible speeds.

Long hub versions available. Contact Renold for details. See key stress calculations on Page 13. Renold can also supply cardan shaft assemblies.

* Maximum Bore - The maximum bores shown are absolute maximums. Under normal circumstances the boss to bore ratio should not be less than 1.5 for standard applications. Consult Renold for overbore approval.

** Speed max rpm dependant on length of spacer, please consult Renold.

*** For all orders please state length of spacer and speed required.

Type A - $Lb = La - 2 \times F$

Type B - $Lb = La - 2 \times F2$

AGMA flange details - common dimensions

The best range of solution chain products available anywhere

RENOLD **Synergy**™

- High performance
- Superior wear life
- Outstanding fatigue resistance

RENOLD **Syno**™

- Maintenance free
- Self-lubricating chain
- Food industry-approved lubricant

RENOLD

- Best premium chain
- Leading performance
- Solid bush / solid roller / end softened pin

Hydro-Service™

- Superior corrosion resistant coating
- Alternative choice to stainless steel chain
- Will not chip or peel
- Hexavalent chrome-free

Steel Pin Bush Roller Chain

- Manufactured to international stds
- Full range of pitch alternatives
- Breaking loads 13 to 900 kN as std
- Attachments to suit varied applications

Leaf Chain

- Comprehensive ranges used worldwide for safety critical lifting applications
- 100 years experience in developing and maintaining lifting chain

Steel Knuckle Chain

- Heavy duty, detachable elevator chains
- Integral K type attachments
- Breaking loads from 642kN to 1724kN
- Sealed joint to extend chain life

Roll-Ring™

- Revolutionary chain tensioner
- Installed in seconds and self adjusting
- Maintenance free
- Also acts as noise damper

Customised Engineering Chain

- Wide range to suit specialised applications using high specification materials and treatment processes
- Designed in close collaboration with customer

Smartlink™

- Load monitoring technology
- Technical reports & data logging
