Automotive technicians worldwide are installing confidence – and building long-term customer loyalty – with high quality SKF brand components. Our expanding product line includes wheel bearing kits and unitized hubs, transmission rebuild kits, seals, timing belt kits, SPEEDI-SLEEVE shaft repair kits and more. Broad market coverage and world-class logistics assure the right part, at the right place, at the right time. For more information about all the ways we can help you install confidence in your customers, too, contact your SKF distributor. Or visit us online: www.vsm.skf.com.

How to use this catalog

Application section

1. Locate manufacturer.
   - Manufacturer's are listed in alphabetical order (refer to "Manufacturer's index" or correct page number)
2. Locate Model.
   - Models are listed within each manufacturer's section
3. Locate your application information.

   Application information is listed in columnar form for each vehicle in the following sequence: Front & Rear Wheel, Pinion, Differential, Clutch, Transaxle, Transfer Case & Transmission. All other applications follow "Transmission" in alphabetical order.
4. Locate year.
5. Once the application has been located, read to the right of the application to find the SKF stock number.
6. For every Bearing Set listed, directly underneath will be the components that make up that set in Cone/Cup sequence.

   This would only apply to Bearing Sets where components are available for purchase separately.

Footnote codes

- For installation guidelines on axle repair bearings, see page 5A.

✪ Check for availability.

✦ Upgraded part number for this application only. Original part number listed above covers other applications.

■ Use old snap ring.

✧ Use existing part number to depletion, then reorder new number listed below. See page 4A for specific information.

▲ N4068 is recommended for heavy duty and 12" lever style clutches.

[ ] Indicates quantity required.

See page 3A for needle bearing package quantities.

S Superseded part - existing part number will show 'S' pop code.
C Consolidated part - existing part number will show active pop code because it has non-automotive applications.

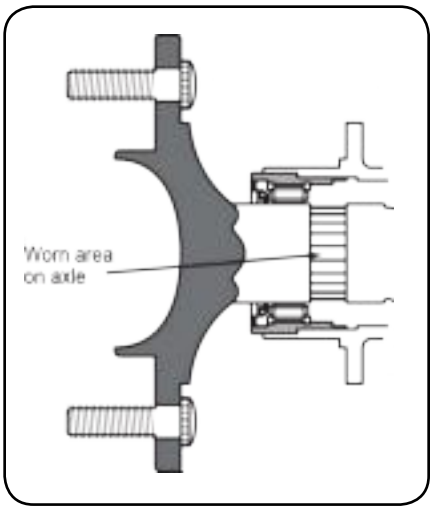
Axle repair bearing assembly

Certain rear wheel bearings use the axle as an inner race; that is the bearing rollers ride directly on the axle shaft itself. The rollers can wear a groove into the axle. Until now the only solution has been to replace the axle itself, a costly approach to repairing the vehicle. Worn axles can be reused now if you install our axle bearing repair assembly.

Simply install the new axle bearing repair assembly in the wheel hub. The rollers and seal of the new bearing repair assembly will now rotate on an unworn portion of the axle. The axle bearing repair assembly replaces both the bearing and the conventional seal requiring no additional parts. The repair bearing is manufactured in two styles. The most common style is a single sealed repair bearing that receives its lubrication from the differential. The second style is a double sealed repair bearing. This bearing is prelubed for the life of the bearing and needs no differential fluid to maintain operation.

Just six part numbers R1559, R1561-F, R1561-G, R1563, R57509 and R59047 cover the most popular Chrysler, Ford and GM axles. Each repair bearing assembly comes ready to install for fast and reliable service. For your convenience the bearing assembly is listed in the application section of this catalog. Merely look up the vehicle in question and both the conventional seal and bearing and the axle bearing repair assembly are listed where available.

Remember to always check the axle tube housing depth prior to installation. Check this depth against the width of the repair bearing. Certain models have narrowed axle tube that will not allow the bearing to fully seat.



Taper bearing packer - BP270

- SKF bearing packer helps do a professional job
- Helps maintain a clean environment essential to bearing life
- Provides a thorough removal of the old grease and installation of the new grease
- Packer comes with grease savers for larger bearings
- Complete instructions included

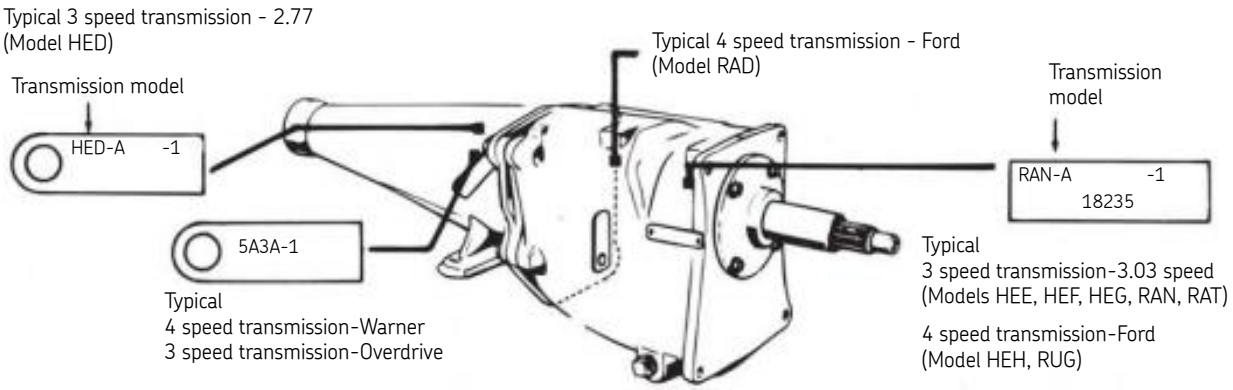
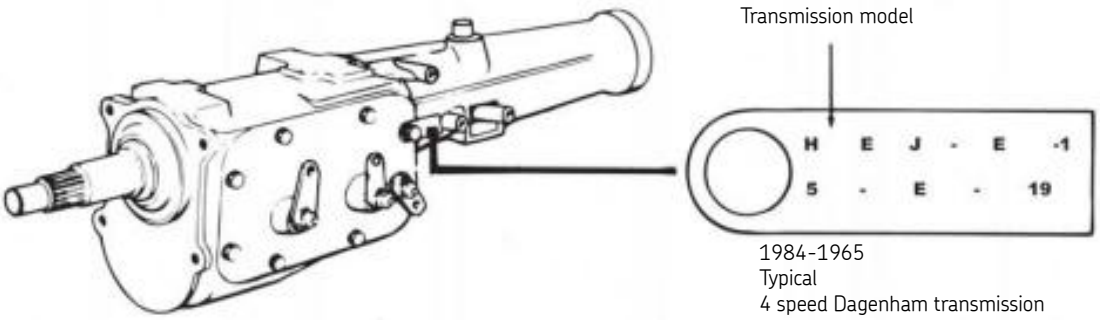
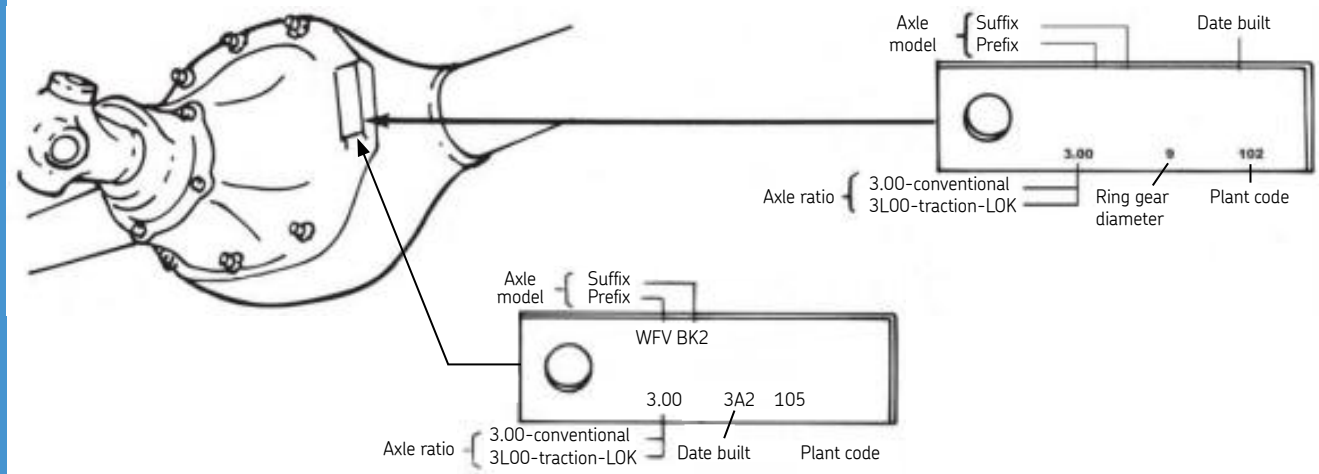
Ford/Lincoln/Mercury manual transmission / transaxle identification 1995-1973



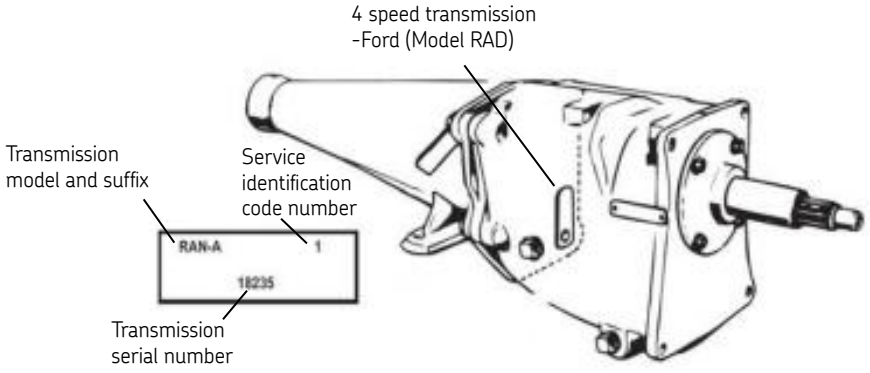


Ford/Lincoln/Mercury rear axle model identification tag

To determine the proper bearing or seal to be used on some Ford Motor Co. products rear axle and pinion applications, it is necessary to know the axle model. This axle model information is printed on a tag located on the rear axle as shown below.

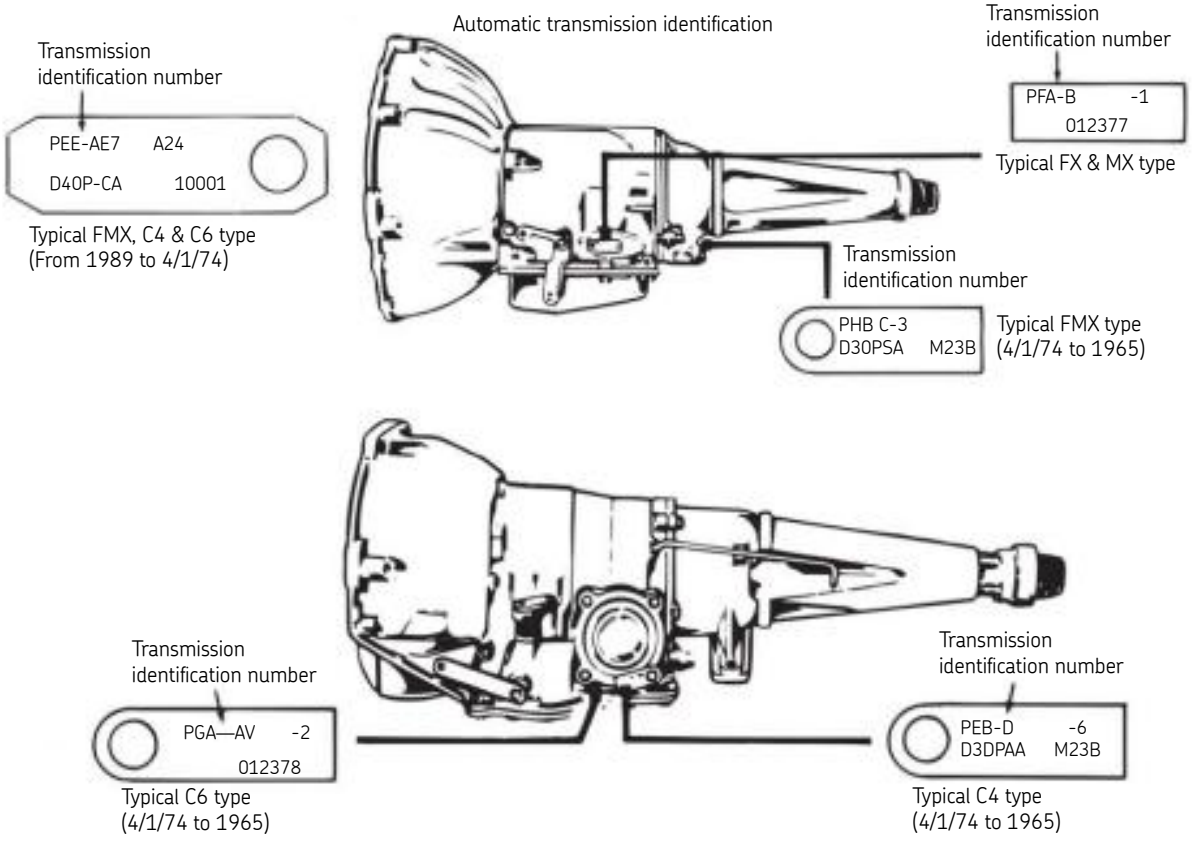


Ford/Lincoln/Mercury manual transmission / transaxle identification 1995-1973

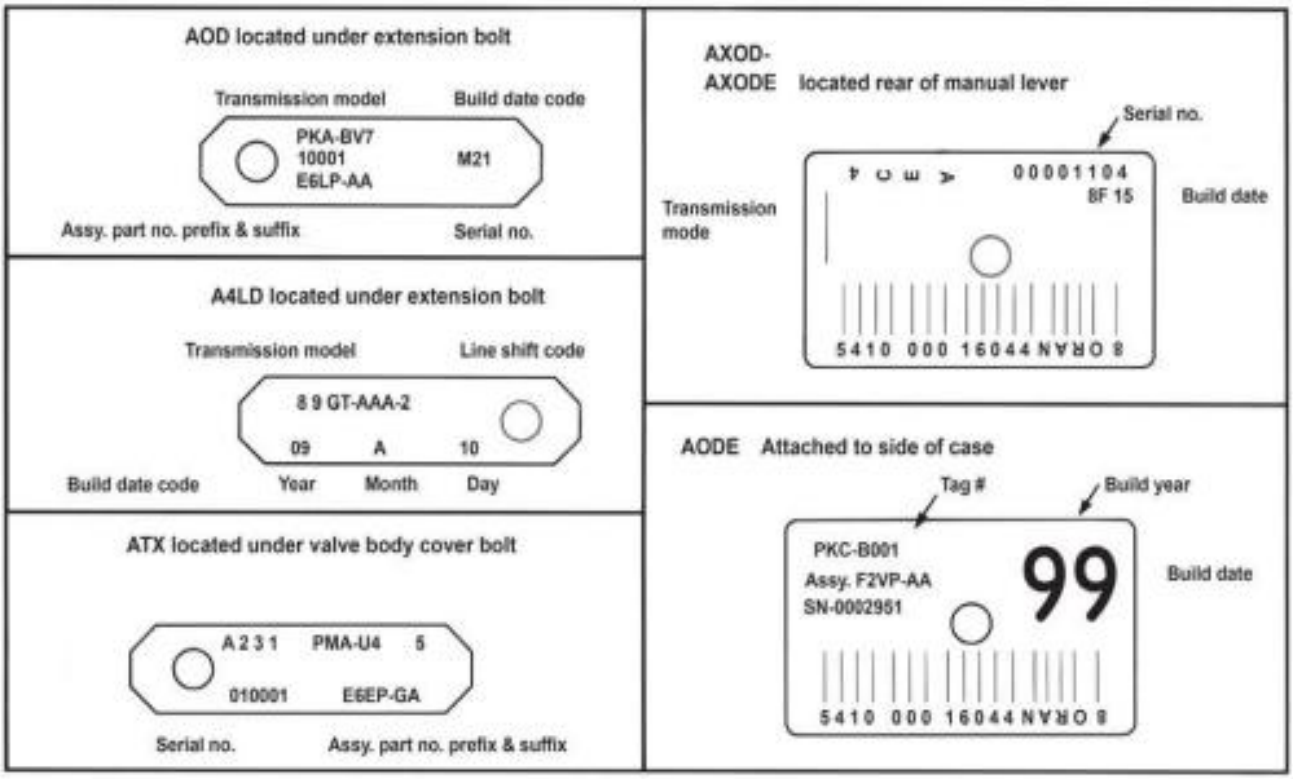


3 speed transmission—3.03 (Models RAN, RAT)
4 speed transmission—Ford (Model RUG)

Ford/Lincoln/Mercury automatic transmission identification 1990-1965



Ford/Lincoln/Mercury automatic transmission / transaxle identification 1995-1991



Ford/Lincoln/Mercury automatic transmission / transaxle identification 1995-1991

4EAT

Located on the transaxle

IF4E

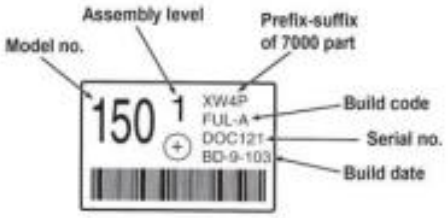
Located on top of the transaxle case

F4E-III

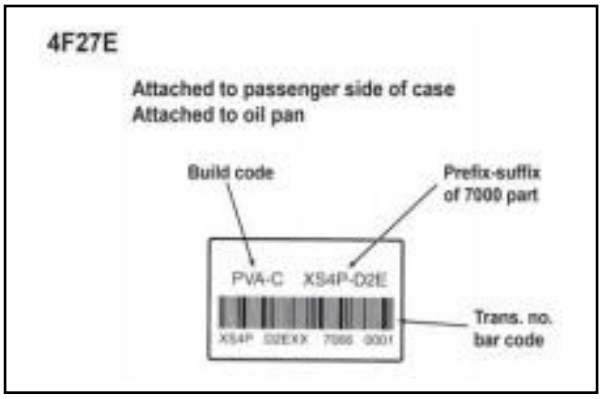
Located on top of the transmission case

5R55N

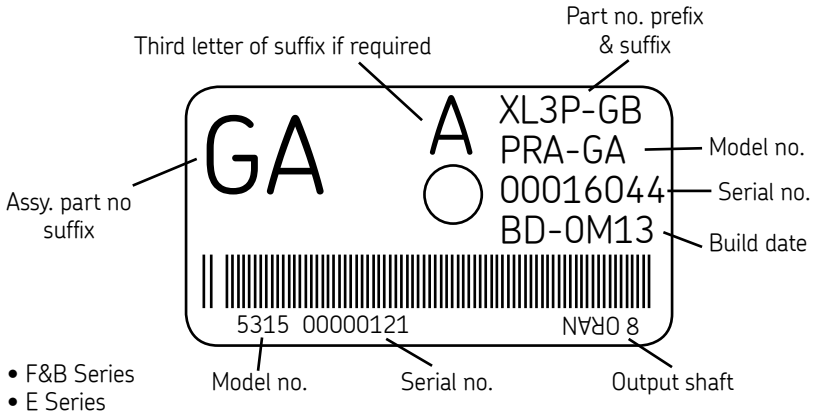
Attached to passenger side of case



Ford/Lincoln/Mercury automatic transmission / transaxle identification 1995-1991



4R100 Located rearward of manual lever



Pink • F&B Series
White • E Series
Yellow • All others

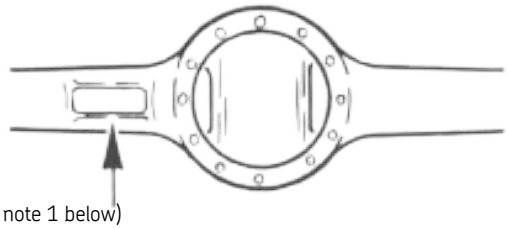
MYC	6	6L80

Option code M13 has oil pan bolt quantity of 19.
Option code MV4 has oil pan bolt quantity of 13 and pan size 13 1/2 x 12 5/16.
Option code MV9 has oil pan bolt quantity of 11 and pan size 13 3/16 x 11 5/8.

General Motors axle identification 1995-1991

Buick, Cadillac, Chevrolet Pass & Truck, Oldsmobile, Pontiac

GM axle codes are found stamped on the rear of the left side axle tube in $^1/_4$" high letters 3" outboard of the carrier, or on a metal tag attached to a cover bolt.



(See note 1 below)

LN — Part code

O — Manufacturing plant code:

B	Buick (Chevrolet Buffalo see note 2 below)	M	GM Canada
C	Chevrolet Buffalo	O	Oldsmobile
G	Chevrolet Gear & Axle	P	Pontiac
K	GM Canada St. Catharines (McKinnon)	W	Chevrolet Warren

319 — Date

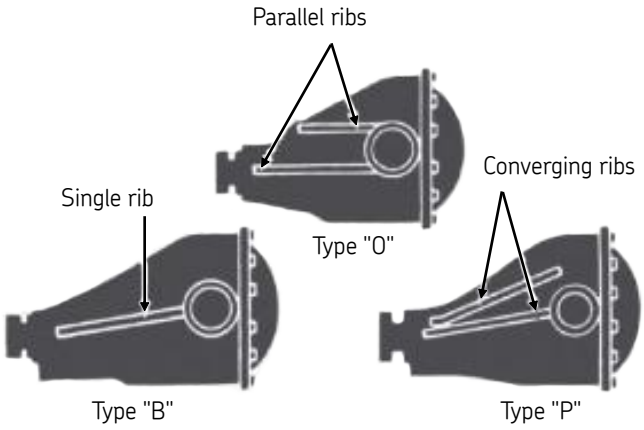
D — Shift
(D) Day
(N) Night

E — Limited slip positraction identification:

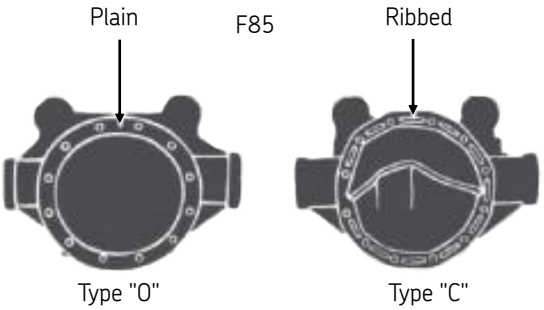
E	Eaton	O	Oldsmobile
G	Chevrolet	W	Borg Warner

Note: 1. 1978 Vehicles have a different identification than shown above, characters 1-3 are the same, however character 4 is the year, characters 5-7 are the julian date and character 8 is the shift code.
2. Some Chevrolets have a 7 character code that contains less information, character 1-2 are vehicle identification, character 3-6 are the month and day produced and character 7 is the manufacturing plant code. On vehicles with the 7 character code, plant B is not Buick, it is Chevrolet Buffalo.

Oldsmobile & F85 Rear Axle Identification



Side view—Rear axle housing



Rear view—Rear axle housing

GM passenger car & light truck engine codes

2008-1981 — 8th Digit of vehicle identification number indicates engine identification
1980-1976 — 5th Digit of vehicle identification number indicates engine identification

To convert liters into cubic inches, multiply by 61.0250

GM brake system information

General Motors "A" body cars (Buick Century, Chevrolet Celebrity, Oldsmobile Ciera, Pontiac 6000) 1995-1991 brake systems

The following information is provided to assist in identification of the brake systems used on "A" body cars.

Refer to the service parts identification label for brake system identification

Example:

"J" options offer brake types used by production

Oil seal installation instructions

1. Check the bore. — The leading edge must be deburred. A rounded corner or chamfer should be provided.

2. Check the shaft. — Remove surface nicks, burrs, grooves and spiral machine marks (machine lead).

3. Check the shaft end. — Remove burrs or sharp edges. The shaft end should be chamfered in applications where the shaft enters the seal against the sealing lip.

4. Check splines and keyways. — Sharp edges should be covered with a lubricated assembly sleeve, shim stock or tape to protect the seal lip.

5. Check dimensions. — Be sure shaft and bore diameters match those specified for the seal selected.

6. Check for parts interference. — Watch out for other machine parts that might rub against the seal and cause friction and damaging heat.

7. Check the seal. — Damage may have occurred prior to installation. A sealing lip that is turned back, cut or otherwise damages should be replaced.

8. Check seal direction. — Make sure that the new seal faces in the same direction as the original one. Generally, the lip faces the lubricant or fluid to be retained.

9. Use the correct installation tools. — Press fitting tools should have an outside diameter approximately .010" (.254 mm) smaller than the bore size. For best results, the center of the tool should be open so that pressure is applied only at the outer edge.

10. Pre-lubricate the sealing element. — Before installation, wipe the element with the lubricant being retained.

11. Never hammer directly on the surface of the seal. — Use proper driving force,such as a soft-face tool, arbor press, or soft workpiece (wood). Apply force evenly around the outer edge to avoid cocking the seal.

12. Position the seal properly in the housing and inspect for alignment and installation damage.

After installation

1. If painting, be sure to mask seal to avoid getting paint on the lip or the shaft where lip rides. Also, mask vents so they will not become clogged.

2. If paint is to be baked or the mechanism otherwise subjected to heat, seal should not be heated to temperatures higher than the seal lip can tolerate.

3. In cleaning or testing, do not subject seals to fluids or pressures that could damage them.

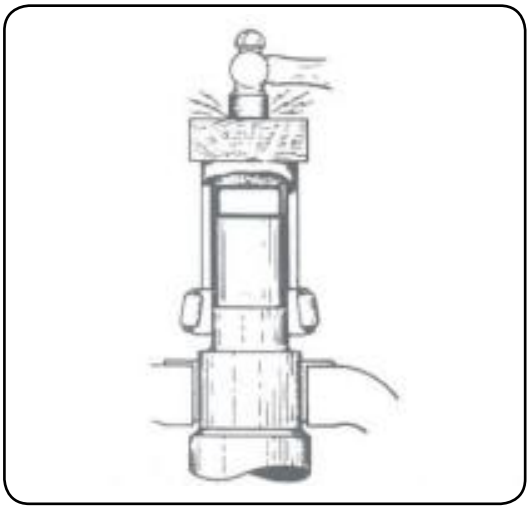
Bearing installation instructions

Premature failure of bearings is often caused by improper procedures during handling and installation. Listed below is a check list to guide you in proper bearing care.

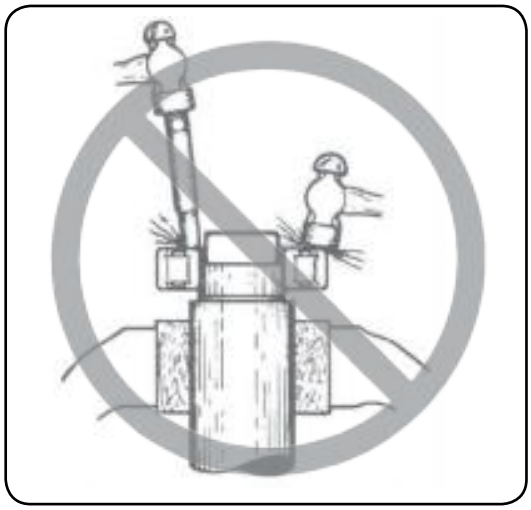
Bearing care check list

1. Make sure work area is clean. As much dirt as possible should be removed before exposing the bearings.
2. All tools should be clean and in good condition.
3. Always handle bearings with clean, dry hands.
4. When cleaning a bearing never use a dirty or contaminated cleaning solution for final rinsing.
5. To wipe and dry bearings always use clean, lint-free cloths.
6. Do not spin a bearing with compressed air.
7. Cover cleaned or new bearings to eliminate contamination by dirt or moisture.
8. Bearing lubes should be clean and stored in sealed containers.
9. Do not clean or wash lubricant from a new bearing.
10. Inspect and clean bore of housing and shaft before installing a bearing.
11. Lubricate the bearing just prior to installation.

Installation procedure



1. Always put the installation pressure against the ring which is the press fit.
2. Use proper tools when installing a cup to eliminate any damage to the bearing surface.

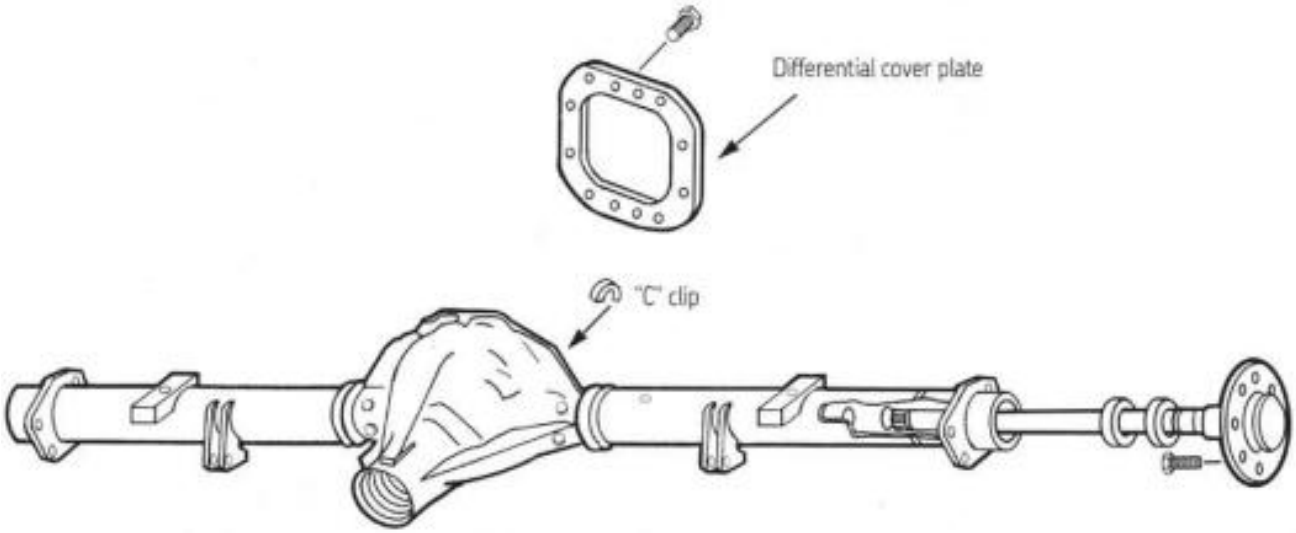


1. Never hammer directly on a bearing; it will damage the bearing and the shaft.

Semi vs. full float axle

Typical semi float axle

The typical semi float axle can not be removed without the differential cover plate and disassembling the "C" clip from the axle first.



Typical full float axle

Pulling the axle through the center of the wheel and rim after removing the wheel cover plate bolts disassembles typical full float axles. The semi float axle can not be removed without removing the differential cover plate and disassembling the "C" clip from the axle first.

WARNING!

Proper selection of the products listed for sale in this catalog is essential to minimize the risk of any seal, bearing or other product failure. Such failures can result in property damage or severe personal injury to operators of machinery, vehicles or to others. You must carefully evaluate the particular application on or into which you intend to install the products. Products in this catalog require installation by an experienced professional mechanic or qualified maintenance professional.

The product properties and operating parameters described in this catalogue are based upon tests conducted by SKF or reported by others. SKF does not assume any responsibility for errors in the data published in this catalog. The life and performance of the products ultimately depend on a number of factors. These include, for example, selection of product design type, selection of materials for their different properties, handling and installation, operating conditions, including shaft surface or bore conditions, the quantity, quality and chemistry of lubricants and other factors. Severe environments can adversely affect product life or performance. For help in realizing longer SKF product life, and optimal performance for your specific application, contact SKF's Customer Services Department at 1-800-882-0008.

LIMITED WARRANTY

SKF warrants to the first purchaser that the products sold by it, when properly installed, will be free from defects in material and workmanship. SKF's sole obligation and liability for any defect found to exist contrary to this limited warranty in a product sold by SKF, and purchaser's sole and exclusive remedy for such defect, shall be limited to: (A) SKF furnishing without additional charge to purchaser, including transportation, a replacement for any of the products sold by SKF which are found by SKF to be defective contrary to this limited warranty, and (B) in the case of products which cannot be repaired or replaced by SKF, SKF shall credit or refund to purchaser the purchase price paid therefore; provided, that SKF is advised in writing of such product non-conformance within thirty (30) days of the date of discovery thereof, and that the non-conforming product is returned f.o.b. to SKF's designated warehouse promptly thereafter, but in any case not later than twelve (12) months (twenty-four (24) months only in the case of light duty hub unit products) from the date of purchase. In no event shall SKF be obligated under this limited warranty or otherwise in any way whatsoever for normal wear and tear, or for any products sold by SKF which, after delivery by SKF and in SKF's sole determination, have been subjected to accident, abuse, misapplication, improper or faulty repair or installation, improper or faulty maintenance or lubrication, any alteration or neglect, excessive loading or other excessive operating conditions, or for defects caused by or resulting from purchaser's specifications or designs or otherwise caused by purchaser. **TO THE FURTHEST EXTENT PERMITTED UNDER APPLICABLE LAW, SKF DISCLAIMS LIABILITY, IN TORT OR CONTRACT, IN NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, FOR ANY OTHER REMEDY OR DAMAGE, WHETHER DIRECT OR INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL WITH RESPECT TO ITS PERFORMANCE HEREUNDER, INCLUDING WITHOUT LIMITATION THE PRODUCTS SOLD OR PROVIDED HEREUNDER BY SKF, AND ITS PROVISION OF ANY RELATED SERVICES. THIS LIMITED WARRANTY IS TO THE EXCLUSION OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. COSTS INCURRED FOR ROUTINE MAINTENANCE ARE NOT COVERED BY THIS LIMITED WARRANTY.** Without limiting the generality of the foregoing, SKF specifically disclaims liability to purchaser for any loss, cost, or damage incurred as a result of equipment downtime, or loss of use or availability of worksite, lost revenues or lost profits, regardless of whether SKF is on notice of the possibility of such damage or loss and did or could have anticipated same. No other person has been authorized by SKF to undertake or make on behalf of SKF any further representation, warranty or guarantee in addition to or contrary to this limited warranty or contrary to the limitations and disclaimers provided herein. The exclusive remedies provided in this limited warranty shall not be deemed to have failed of their essential purpose so long as SKF is willing and able to perform to the extent and in the manner prescribed in this limited warranty.

SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. This limited warranty gives you specific legal rights, and you may also have other rights, which vary state to state.

INFORMATION AND RETURNS: This catalog refers to products as designed prior to its publication, and does not cover product changes made after its publication date. Inquiries can be directed to: SKF Customer Service Department, 890 North State Street, Suite 200, Elgin, IL 60123, or call 1-800-882-0008. Any error in shipment (for over-shipments in the quantity of product or for product not matching purchaser's description given in its order) is returnable for credit or replacement by SKF, provided that SKF is advised in writing by purchaser of such non-conformance within 30 days after the product's delivery to purchaser, and only after written authorization therefore is given by SKF. Approved returns must be shipped freight prepaid and arrive in good, saleable condition to qualify for credit or replacement. SKF shall not otherwise be obligated to accept the return of any products sold or distributed by it.

NOTICE: The SKF part numbering systems for the SKF products are proprietary to SKF. Any improper or unauthorized use of these numbering systems, including adoption or use of any of their part numbers or part number lists, even where the subject of modification or addition, is strictly prohibited and will be prosecuted by SKF as a violation of U.S. and foreign copyright, trademark and unfair competition laws. In addition, use of any SKF trademarks, trade names or packaging schemes, systems, colors or designs is likewise considered a violation of the trademarks, trade names and trade identities rights of SKF USA Inc. and their affiliates. Possible violation of such use should be brought to the attention of SKF: SKF USA Inc., 890 North State Street, Suite 200, Elgin, Illinois 60123, Attn: Catalog Manager.

Modo de empleo del catálogo

Sección de aplicaciones

1. Localice al fabricante.
   - Los fabricantes se listan en orden alfabético (consulte el "Índice de fabricantes" o el número de página correcta)
2. Localice el modelo.
   - Los modelos se listan dentro de la sección de cada fabricante
3. Localice la información relacionada con su aplicación.

   La información de las aplicaciones se lista en forma de columnas para cada vehículo en la siguiente secuencia: Ruedas delanteras y traseras, Piñón, Diferencial, Embrague, Transeje, Caja de transferencia y Transmisión. Todas las demás aplicaciones se encuentran después de "Transmisión" en orden alfabético.
4. Localice el año.
5. Una vez que haya localizado la aplicación, lea el número de inventario de SKF a la derecha de la aplicación.
6. Para cada juego de rodamientos listado, directamente debajo se encuentran los componentes que forman el juego en la secuencia Cono/Taza.

   Esto sólo se aplica a los juegos de rodamientos donde los componentes están disponibles para comprarse de manera separada.

Códigos de nota de pie de página

- Para conocer las Guías de instalación de los Rodamientos de reparación de eje, vea la página 5B.

✪ Compruebe si hay disponibilidad.

✦ Número de parte actualizado sólo para esta aplicación. El número de parte original, listado líneas abajo, cubre otras aplicaciones.

■ Utilice el anillo de expansión viejo.

✧ Utilice el Número de parte existente para agotar el inventario, después vuelva a ordenar el Número nuevo listado líneas abaio. Vea las página 4B para obtener la información específica.

▲ Se recomienda el número de parte N4068 para trabajo pesado y embragues tipo palance de 12 pulgadas.

[ ] Indica la Cantidad requerida. Vea la página 3B para las Cantidades de paquetes de rodamientos de agujas.

C Pieza consolidada - el número de pieza existente mostrará el código pop activo debido a que no tiene aplicaciones automotrices.

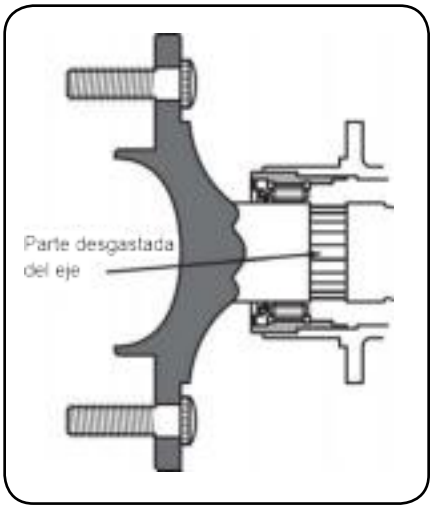
Conjunto de rodamiento de reparación de eje

Ciertos rodamientos de rueda trasera utilizan el eje como la pista interior; o sea que los rodillos del rodamiento se mueven directamente sobre la flecha del eje. Los rodillos pueden producir, por desgaste, una ranura en el eje. Hasta la fecha la única solución que existía era el reemplazo del eje, una aproximación costosa a la reparación del vehículo. Ahora, los ejes desgastados se pueden volver a utilizar si se instala nuestro conjunto de reparación de rodamiento de eje.

Simplemente instale el nuevo conjunto de reparación de rodamiento de eje en la maza de la rueda. Los rodillos y el sello del nuevo conjunto de reparación de rodamiento ahora girarán en una porción sin desgaste del eje. El conjunto de reparación de rodamiento de eje sustituye al rodamiento y al sello convencional y por lo tanto no requiere de piezas adicionales. El rodamiento de reparación se fabrica en dos modelos. El modelo más común es un rodamiento de reparación sencillo sellado que recibe la lubricación del diferencial. El segundo modelo es un rodamiento de reparación doble sellado. Este rodamiento está prelubricado de por vida y no necesita de ningún lubricante del diferencial para mantener su funcionamiento.

Sólo seis números de pieza R1559, R1561-F, R1561-G, R1563, R57509 y R59047 cubren los ejes más vendidos de Chrysler, Ford y GM. Cada conjunto de rodamiento de reparación viene listo para instalarse y de esta manera obtener un servicio rápido y confiable. Para su conveniencia los conjuntos de rodamiento se listan en la sección de aplicaciones de este catálogo. Únicamente busque el vehículo en cuestión, el sello y el rodamiento convencional y se listan los conjuntos de reparación de rodamiento de eje donde están disponibles.

Antes de la instalación, recuerde comprobar siempre la profundidad del alojamiento del tubo del eje. Compruebe esta profundidad contra el ancho del rodamiento de reparación. Algunos modelos tienen el tubo del eje más estrecho, lo cual no permitirá que el rodamiento asiente por completo.



Embalador de rodamientos cónicos - BP270

- El embalador de rodamientos SKF ayuda a realizar un trabajo profesional
- Ayuda a mantener un ambiente limpio esencial para la vida del rodamiento
- Proporciona la eliminación completa de la grasa vieja y la instalación de la grasa nueva
- El embalador trae economizadores de grasa para los rodamientos grandes
- Se incluyen instrucciones completas

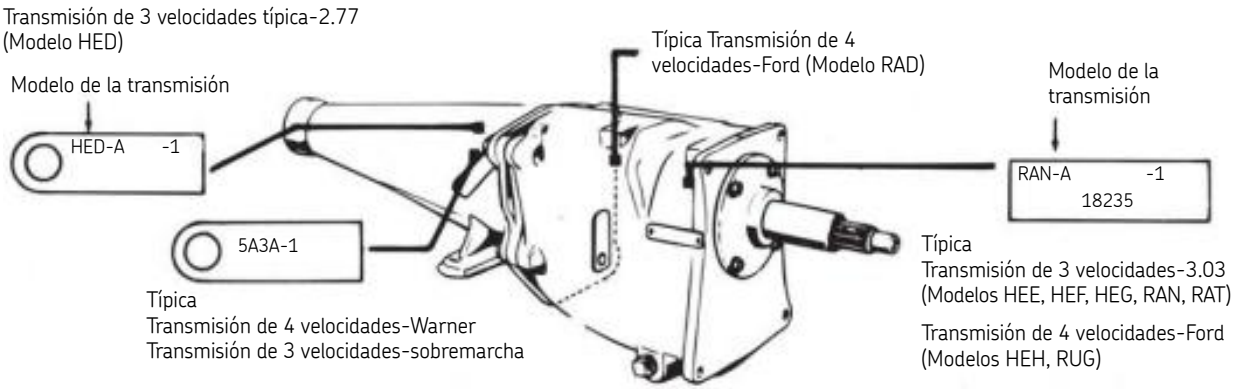
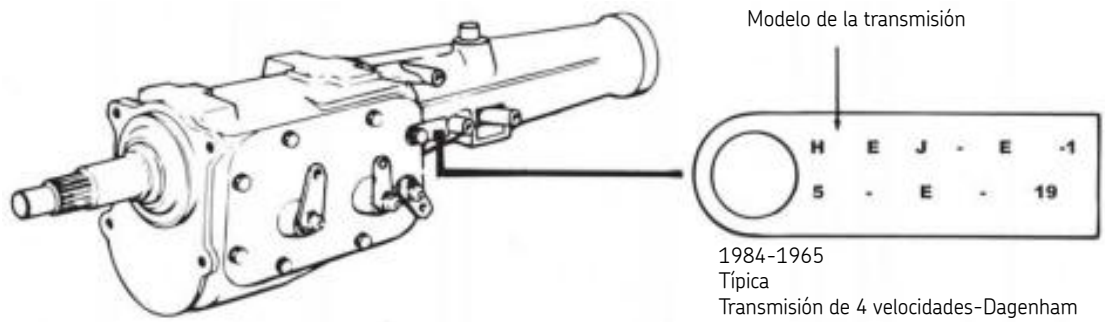
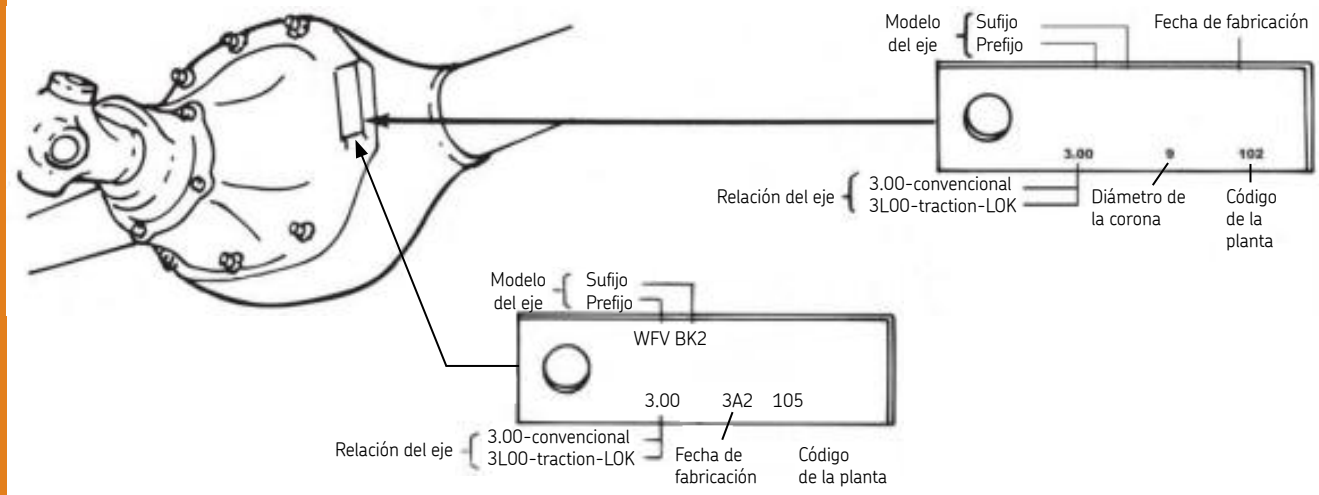
Identificación de las transmisiones/transejes manuales Ford/Lincoln/Mercury 1995-1973



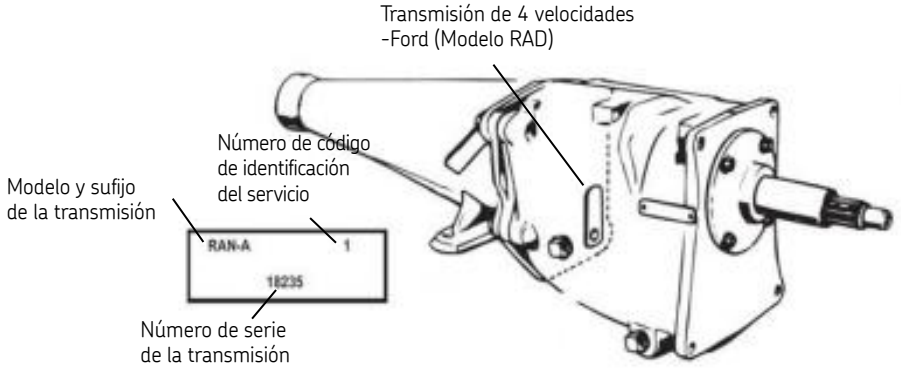


Tarjeta de identificación de los modelos de ejes traseros Ford/Lincoln/Mercury

Para determinar el rodamiento o el sello correcto que se va a utilizar en algunas aplicaciones de eje trasero y piñón de los productos de Ford Motor Company, es necesario conocer el modelo del eje. Esta información del modelo del eje está impresa en una tarjeta ubicada en el eje trasero como se muestra a continuación.

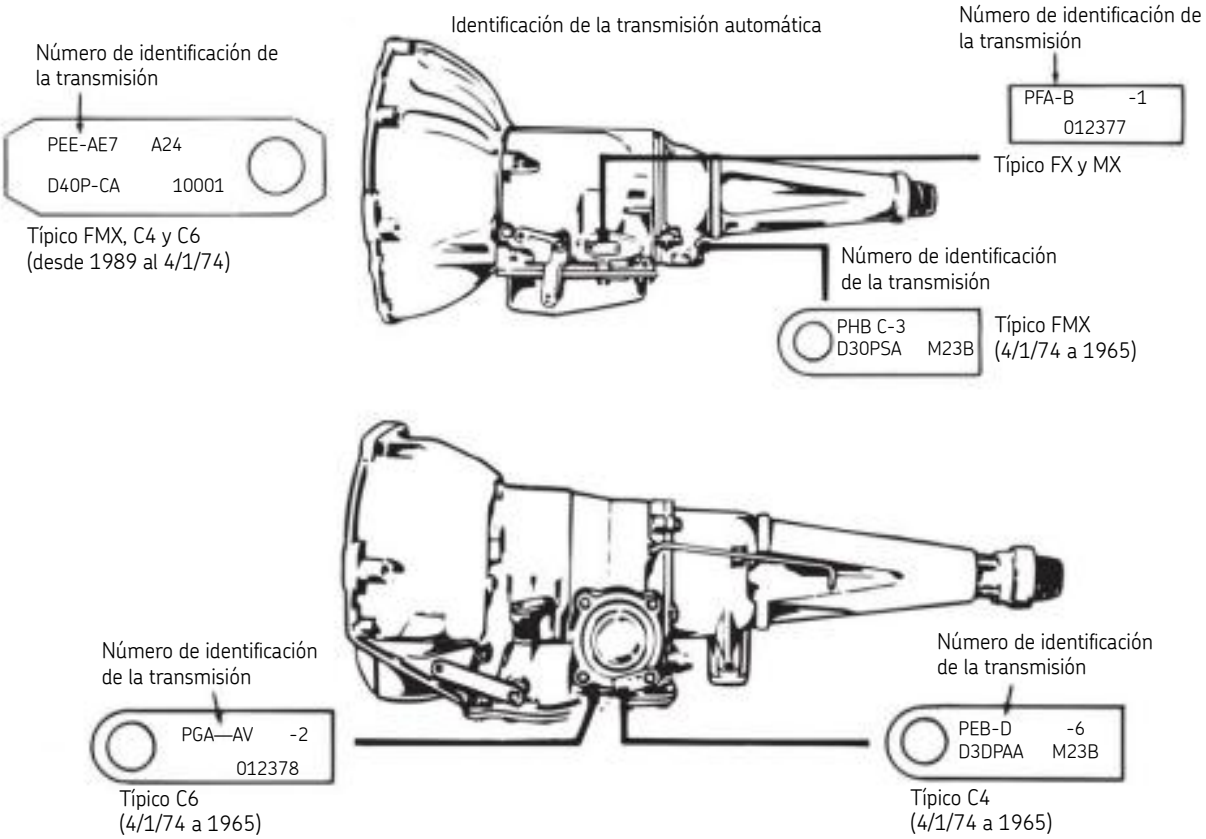


Identificación de las transmisiones/transejes manuales Ford/Lincoln/Mercury 1995-1973

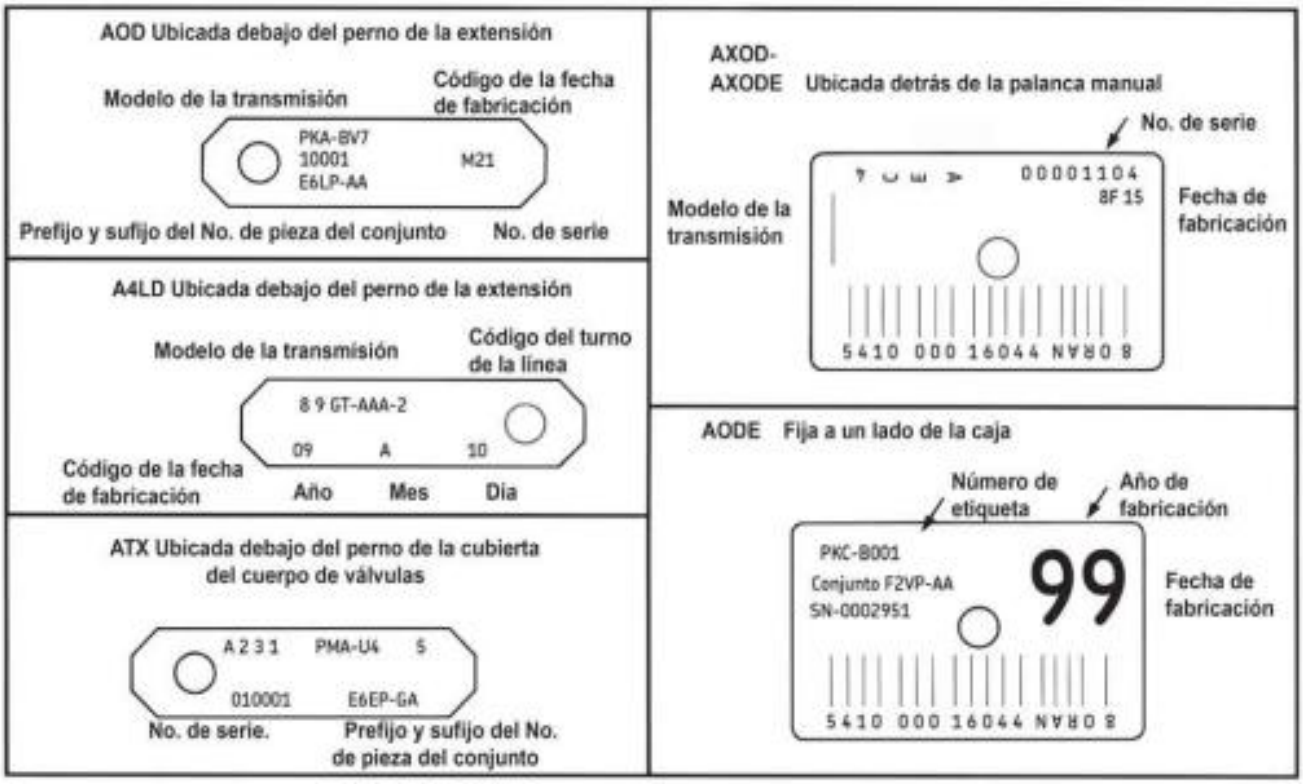


Transmisión de 3 velocidades—3.03 (Modelos RAN, RAT)
Transmisión de 4 velocidades—Ford (Modelo RUG)

Identificación de las transmisiones automáticos Ford/Lincoln/Mercury 1990-1965



Identificación de las transmisiones/transejes automáticos Ford/Lincoln/Mercury 1995-1991



Identificación de las transmisiones/transejes automáticos Ford/Lincoln/Mercury 1995-1991

4EAT

Ubicada sobre el transeje

IF4E

Ubicada en la parte superior de la caja del transeje

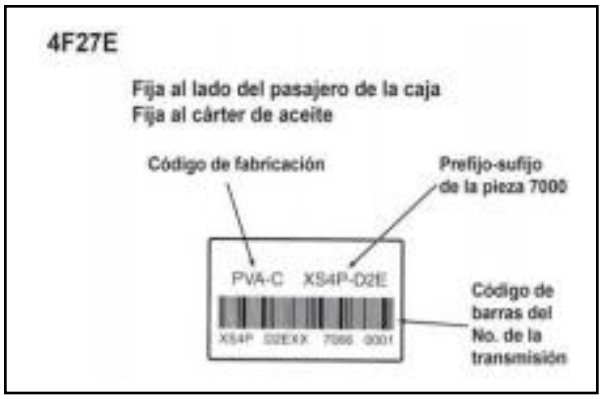
F4E-III

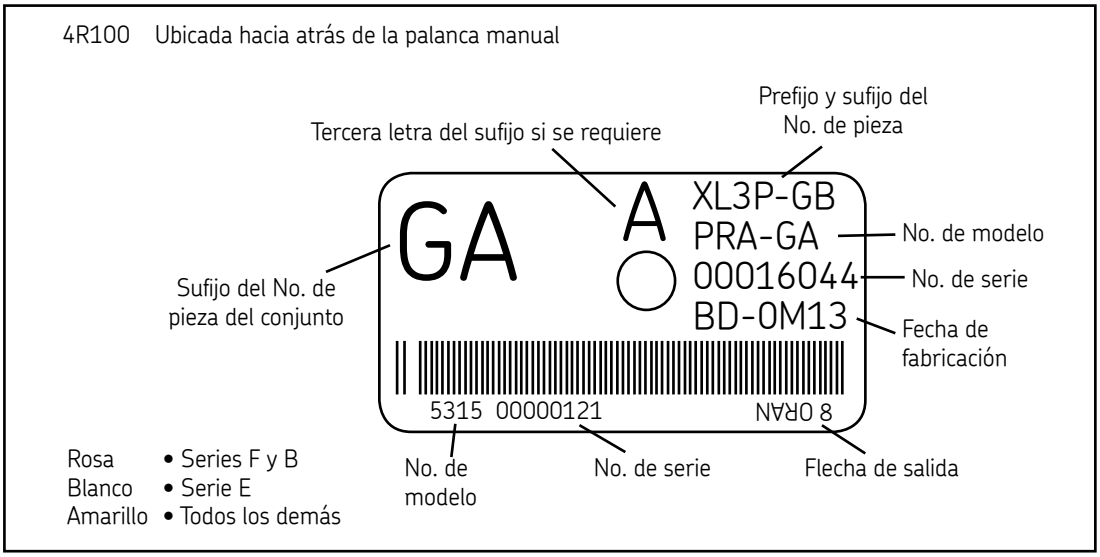
Ubicada en la parte superior de la caja de la transmisión

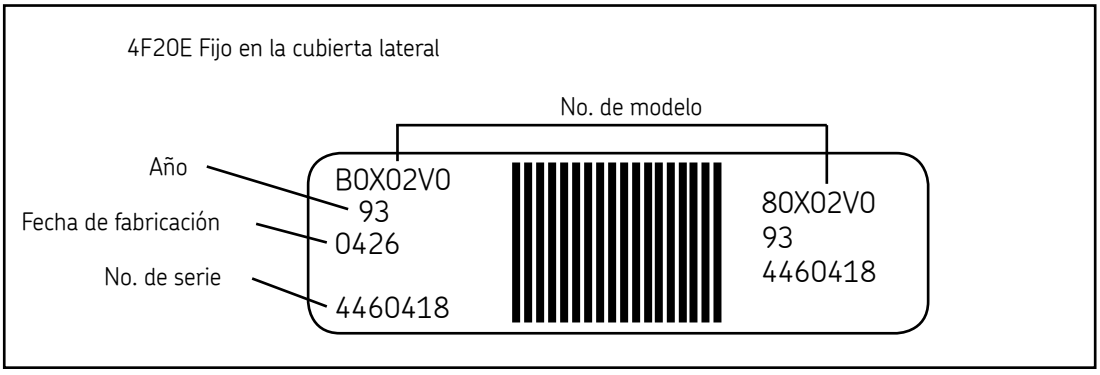
5R55N

Fija al lado del pasajero de la caja

Identificación de las transmisiones/transejes automáticos Ford/Lincoln/Mercury 1995-1991







Códigos de los motores para vehículos de pasajeros Ford

2008-1981 — El 8º. dígito del número de identificación del vehículo indica la identificación del motor
1980-1973 — El 5º. dígito del número de identificación del vehículo indica la identificación del motor

Para convertir litros en pulgadas cúbicas, multiplique por 61.0250

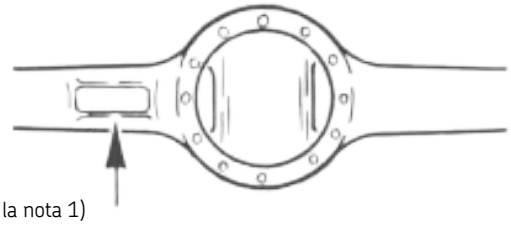
El código de la opción M13 tiene 19 pernos del cárter de aceite.
El código de la opción MV4 tiene 13 pernos del cárter de aceite y un tamaño del cárter de 13 1/2 x 12 5/16.
El código de la opción MV9 tiene 11 pernos del cárter de aceite y un tamaño del cárter de 13 3/16 x 11 5/8.

Identificación de los ejes General Motors 1995-1991

Vehículos de pasajeros Buick, Cadillac, Chevrolet y camionetas, Oldsmobile, Pontiac

Los códigos de los ejes GM se encuentran estampados en la parte trasera del tubo del eje del lado izquierdo en letras de 1/4 de pulgada de altura a 3 pulgadas del soporte o en una tarjeta metálica fija a un perno de la cubierta.



LN — Código de la pieza

O — Código de la planta fabricante:

B	Buick (Chevrolet Buffalo vea la nota 2)	M	GM Canada
C	Chevrolet Buffalo	O	Oldsmobile
G	Chevrolet Gear & Axle	P	Pontiac
K	GM Canada St. Catharines (McKinnon)	W	Chevrolet Warren

319 — Fecha

D — Turno
(D) Matutino
(N) Nocturno

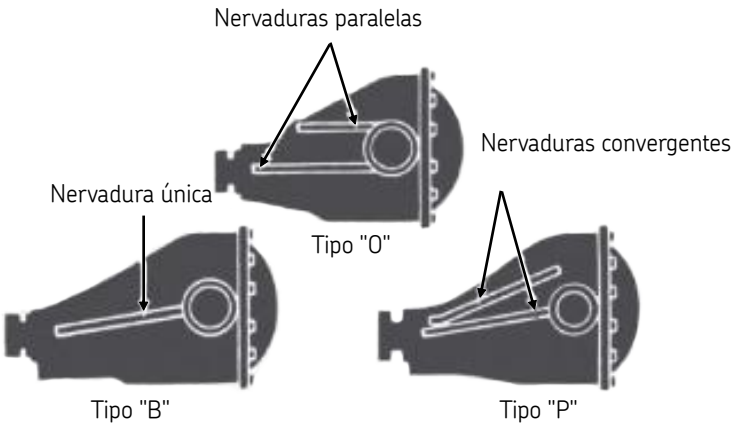
E — Identificación del diferencial de deslizamiento limitado:

E	Eaton	O	Oldsmobile
G	Chevrolet	W	Borg Warner

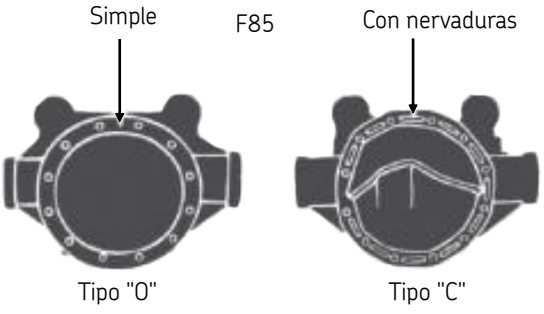
(Vea la nota 1)

Nota: (1) Los vehículos 1978 tienen una identificación diferente a la que se muestra arriba, los caracteres 1-3 son los mismo, sin embargo el carácter 4 es el año, los caracteres 5-7 son la fecha juliana y el carácter 8 es el código del turno.
(2) Algunos vehículos Chevrolet tiene un código de 7 caracteres que contiene menos información, los caracteres 1-2 son la identificación del vehículo, los caracteres 3-6 son el mes y el día de producción y el carácter 7 es el código de la planta fabricante. En los vehículos con el código de 7 caracteres, la planta B no es Buick, es Chevrolet Buffalo.

Identificación de los ejes traseros Oldsmobile y F85



Vista lateral—Carcasa del eje trasero



Vista trasera—Carcasa del eje trasero

Códigos de los motores de los vehículos de pasajeros y de las camionetas ligeras GM

2008-1981 — El 8º. dígito del número de identificación del vehículo indica la identificación del motor
1980-1976 — El 5º. dígito del número de identificación del vehículo indica la identificación del motor

Información del sistema de frenos GM

Sistemas de frenos de los vehículos con carrocería "A" General Motors (Buick Century, Chevrolet Celebrity, Oldsmobile Ciera, Pontiac 6000) 1995-1991

La siguiente información se proporciona para ayudar en la identificación de los sistemas de frenos que se utilizan en los vehículos con carrocería "A".

Consulte la Etiqueta de identificación de las piezas de refacciones para la identificación del sistema de frenos.

Instrucciones de instalación de los sellos de aceite

1. Verifique el alojamiento. — El borde delantero debe estar libre de rebabas. Debe tener una esquina o chaflán redondeado.

2. Verifique la flecha. — Elimine las melladuras, rebabas, ranuras y marcas en espiral de la máquina (guía de la máquina).

3. Verifique el extremo de la flecha. — Elimine las rebabas o los bordes filosos. El extremo de la flecha debe tener chaflán en las aplicaciones donde la flecha entra en el lado de sellado del sello.

4. Verifique las estrías y los cuñeros. — Los bordes filosos se deben cubrir con una camisa del conjunto lubricada, una pila de calzas o cinta para proteger el labio del sello.

5. Verifique las dimensiones. — Asegúrese de que los diámetros de la flecha y el alojamiento coinciden con los especificados para el sello seleccionado.

6. Verifique que no exista interferencia con otras piezas. — Observe que no haya otras piezas de la máquina que puedan tallarse contra el sello ocasionando fricción y calentamiento dañino.

7. Verifique el sello. — Puede haberse dañado antes de la instalación. Se debe sustituir un sello que presenta el labio de sellado volteado, cortado o está dañado de alguna otra forma.

8. Verifique la orientación del sello. — Asegúrese de que el sello nuevo se orienta en la misma dirección que el original. Generalmente, el labio queda del lado del lubricante o del fluido que va a retener.

9. Utilice las herramientas de instalación correctas. — Las herramientas de ajuste a presión deben tener un diámetro exterior aproximadamente 0.010" (0.254 mm) menor que el del alojamiento. Para obtener mejores resultados, el centro de la herramienta debe estar abierto para que la presión se aplique sólo en el borde exterior.

10. Prelubrique el elemento de sellado. — Antes de la instalación, humedezca el elemento con el lubricante que se va a retener.

11. Nunca golpee con un martillo directamente sobre la superficie del sello. — Utilice la fuerza de empuje adecuada, como la de una herramienta de superficie suave, una prensa de ariete o una pieza de madera. Aplique la fuerza de manera uniforme alrededor del borde exterior para evitar levantar el sello de un lado.

12. Coloque el sello adecuadamente en la carcasa, inspeccione que la alineación sea la correcta y que no existan daños debidos a la instalación.

Después de la instalación.

1. Si va a aplicar pintura, asegúrese de cubrir el sello para evitar que entre pintura en el labio o en la superficie de la flecha donde hace contacto el labio. También, cubra los respiraderos para que no se obstruyan.

2. Si la pintura se va a hornear o se va a aplicar calor al mecanismo, el sello no se debe calentar a una temperatura superior a la que puede tolerar el labio.

3. Si limpian o se realizan pruebas, no sujete los sellos a fluidos o presiones que pueden dañarlos.

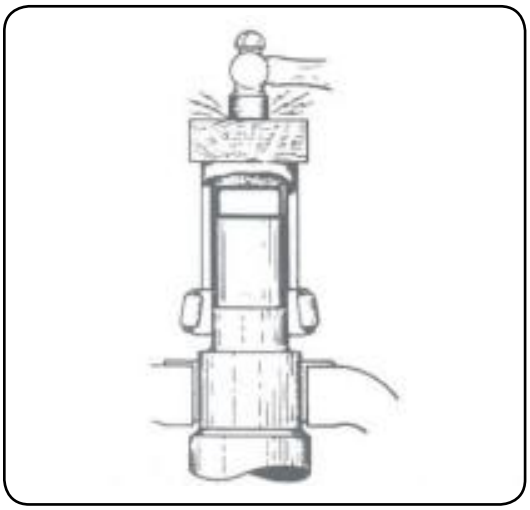
Instrucciones de instalación de los rodamientos

Los procedimientos incorrectos durante el manejo y la instalación, son la causa más frecuente de la falla prematura de los rodamientos. A continuación encontrará una lista de comprobación que lo guiará en el cuidado adecuado de los rodamientos.

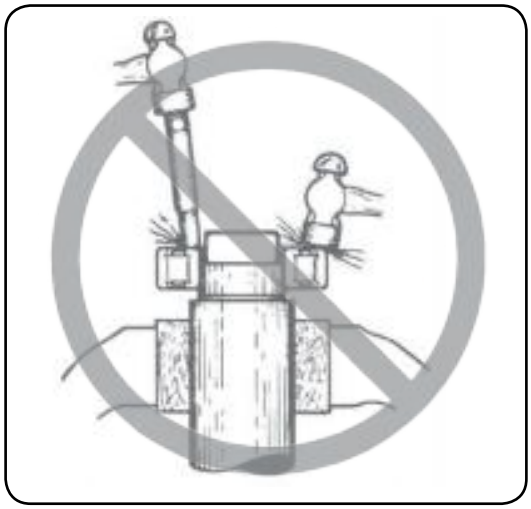
Lista de comprobación para el cuidado de los rodamientos

1. Asegúrese de que el área de trabajo está limpia. Antes de exponer los rodamientos debe eliminarse toda la suciedad que sea posible.
2. Todas las herramientas deben estar limpias y en buenas condiciones.
3. Siempre maneje los rodamientos con las manos limpias y secas.
4. Para limpiar un rodamiento nunca utilice una solución de limpieza sucia o contaminada para el enjuague final.
5. Para limpiar y secar los rodamientos siempre utilice tela limpia, que no desprenda pelusa.
6. No haga girar un rodamiento utilizando aire comprimido.
7. Cubra los rodamientos recién limpiados o nuevos para evitar la contaminación con suciedad o humedad.
8. Los lubricantes para sellador deben estar limpios y se deben almacenar en recipientes sellados.
9. No quite o lave el lubricante de un rodamiento nuevo.
10. Inspeccione y limpie el alojamiento en la carcasa y la flecha antes de instalar un rodamiento.
11. Lubrique el rodamiento justo antes de la instalación.

Procedimiento de instalación



1. Siempre aplique la presión de instalación contra el anillo en el cual se encuentra el ajuste a presión.
2. Para evitar cualquier daño en la superficie del rodamiento, utilice las herramientas adecuadas para instalar una taza.

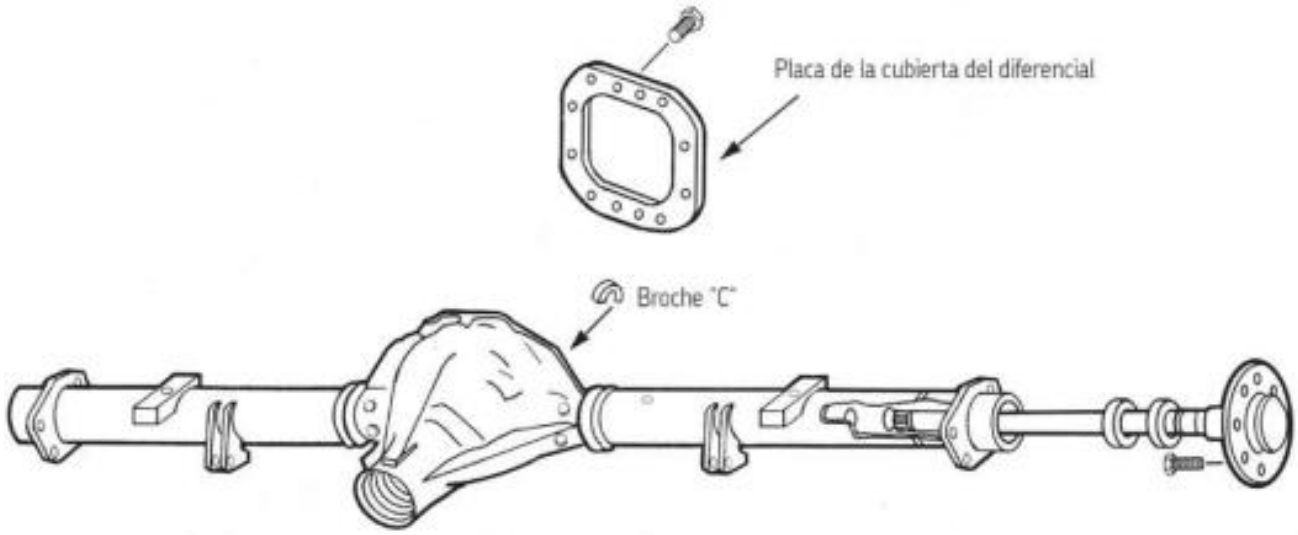


1. Nunca golpee con un martillo directamente sobre el rodamiento, esta acción dañará el rodamiento y la flecha.

Eje semi flotante frente a eje completamente flotante

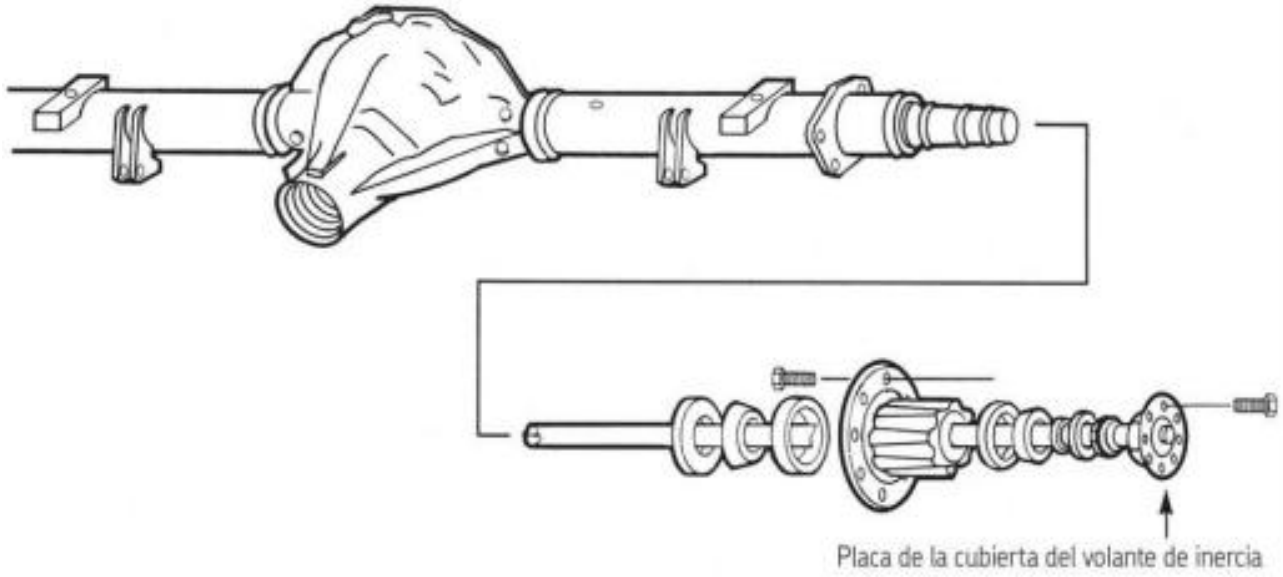
Eje semi flotante típico

El eje semi flotante típico no se puede desmontar sin quitar la placa de la cubierta del diferencial y desensamblando primero el broche "C" del eje.



Eje completamente flotante típico

Los ejes completamente flotantes típicos se desensamblan jalando el eje a través del centro de la rueda y del aro de la rueda después de quitar los pernos de la placa de la cubierta de la rueda. El eje semi flotante típico no se puede desmontar sin quitar la placa de la cubierta del diferencial y desensamblando primero el broche "C" del eje.



Notas

ADVERTENCIA!

La selección correcta de los productos enumerados para venta en este catálogo es esencial para minimizar el riesgo de falla de los sellos, cojinetes u otros productos. Tales fallas pueden ocasionar daños a la propiedad o lesiones graves a los operadores de maquinarias, vehículos u otros. Debe evaluar cuidadosamente la aplicación particular sobre o en la que usted prevé instalar los productos. Los productos de este catálogo requieren instalación por un mecánico profesional experimentado o un profesional de mantenimiento calificado.

Las propiedades y los parámetros operacionales descritos en este catálogo se basan en pruebas realizadas por SKF o informadas por terceros. SKF no asume ninguna responsabilidad por los errores de los datos publicados en este catálogo. La vida útil y el rendimiento de los productos dependen, en última instancia, de varios factores. Entre ellos, por ejemplo, está la selección del tipo de diseño del producto, la selección de los materiales por sus diferentes propiedades, la manipulación e instalación, las condiciones de funcionamiento, incluidas las condiciones de las superficies de los ejes y el interior de los orificios, la cantidad, calidad y composición química de los lubricantes y otros factores. Los ambientes inclementes pueden afectar adversamente a la vida útil o el rendimiento de los productos. Para obtener asistencia a fin de prolongar la vida útil de los productos SKF, así como para lograr un rendimiento óptimo en su aplicación específica, comuníquese con el Departamento de Servicio al Cliente al 1-800-882-0008.

GARANTÍA LIMITADA

SKF garantiza al primer comprador que los productos que vende, cuando se instalan correctamente, están libres de defectos de material y mano de obra. La única obligación y responsabilidad legal de SKF por cualquier defecto que ésta determine que exista y esté cubierto por esta garantía limitada en un producto vendido por SKF, así como la única y exclusiva reparación de tal defecto, está limitada a: (A) La provisión por parte de SKF sin cargo adicional al comprador, incluido el transporte, de un reemplazo de cualquiera de los productos vendidos por SKF que ésta determina que es defectuoso y esté cubierto por esta garantía limitada y (B), en el caso de los productos que SKF no pueda reparar ni reemplazar, SKF acreditará o reembolsará al comprador el precio de compra pagado por el producto siempre que se le notifique por escrito acerca de tal defecto del producto dentro de los treinta (30) días de la fecha de descubrimiento del mismo, y que el producto defectuoso se devuelva f.o.b. al depósito designado por SKF sin demora, pero en todo caso antes de los doce (12) meses (veinticuatro (24) meses únicamente en el caso de los productos de unidades de cubos para servicio liviano) a partir de la fecha de compra. SKF no está obligada en ningún caso, según esta garantía limitada ni de ninguna otra manera, por el desgaste natural debido al uso normal, o por los productos vendidos por SKF que, después de su entrega por ésta y a la sola determinación de SKF, han sido sometidos a accidentes, abusos, aplicaciones incorrectas, reparación o instalación incorrectas o defectuosas, mantenimiento o lubricación incorrectos o defectuosos, cualquier alteración o negligencia, carga excesiva u otras condiciones de funcionamiento excesivas, como tampoco por los defectos causados o resultantes de especificaciones o diseños del comprador, o causados por éste de cualquier otra manera. HASTA EL MÁXIMO QUE PERMITEN LAS LEYES VIGENTES, SKF DECLINA TODA RESPONSABILIDAD LEGAL, BASADA EN ACTOS EXTRACONTRACTUALES O CONTRACTUALES, EN NEGLIGENCIA, RESPONSABILIDAD CIVIL ESTRICTA O DE OTRO TIPO, POR CUALQUIER OTRA REPARACIÓN O DAÑOS Y PERJUICIOS, YA SEAN DIRECTOS O INDIRECTOS, INCIDENTALES, ESPECIALES, EJEMPLARES O CONSECUENTES CON RESPECTO AL CUMPLIMIENTO DE LA PRESENTE, INCLUIDOS SIN LIMITACIONES LOS PRODUCTOS VENDIDOS O PROVISTOS SEGÚN LA PRESENTE POR SKD, ASÍ COMO SU PROVISIÓN DE CUALQUIER SERVICIO RELACIONADO. ESTA GARANTÍA LIMITADA EXCLUYE TODAS LAS DEMÁS GARANTÍAS, EXPRESAS O IMPLÍCITAS, INCLUIDAS LAS GARANTÍAS DE COMERCIABILIDAD O APTITUD PARA UN PROPÓSITO PARTICULAR. ESTA GARANTÍA LIMITADA NO CUBRE LOS COSTOS INCURRIDOS PARA EL MANTENIMIENTO DE RUTINA. Sin limitar la generalidad de lo antedicho, SKF declina específicamente la responsabilidad legal ante el comprador por cualquier pérdida, costo o daño incurrido como resultado del tiempo que el equipo estuvo fuera de servicio, o las pérdidas de uso o disponibilidad del lugar de la obra, los ingresos o ganancias caídos, independientemente de que SKF estuviera notificada de la posibilidad de tales daños o pérdidas y hubiera podido o no prevenirlas. SKF no autoriza a ninguna otra persona a tomar a cargo o realizar en nombre de SKF ninguna manifestación o garantía ulterior adicional o contraria a esta garantía limitada o a las limitaciones y declinaciones de responsabilidad establecidas en la presente. Las reparaciones exclusivas previstas en esta garantía limitada no se considerarán fallidas en cuanto su propósito esencial siempre que SKF esté dispuesta y sea capaz de cumplirlas con el alcance y de la manera prescriptos en esta garantía limitada.

ALGUNOS ESTADOS NO PERMITEN LIMITACIONES DE LA DURACIÓN DE UNA GARANTÍA IMPLÍCITA O LA EXCLUSIÓN O LIMITACIÓN DE LOS DAÑOS Y PERJUICIOS INCIDENTALES O CONSECUENTES, DE MODO QUE LAS EXCLUSIONES O LIMITACIONES ARRIBA INDICADAS PUEDEN NO APLICARSE A SU CASO. Esta garantía le otorga derechos legales específicos y usted puede tener otros derechos, que varían según el estado.

INFORMACIÓN Y DEVOLUCIONES: Este catálogo se refiere a los productos diseñados antes de su publicación y no cubre los cambios a los productos realizados después de esa fecha. Las consultas pueden dirigirse a: SKF Customer Service Department, 890 North State Street, Suite 200, Elgin, IL 60123, o por teléfono al 1-800-882-0008. En caso de cualquier error de entrega (excesos en la cantidad de despacho del producto o productos que no coinciden con la descripción dada por el cliente en su orden de compra) puede efectuarse la devolución para crédito o reemplazo por SKF, siempre que el comprador notifique tal discrepancia a SKF por escrito dentro de los 30 días posteriores a la entrega del producto al comprador y sólo después que SKF otorgue la autorización correspondiente por escrito. Las devoluciones aprobadas deben despacharse con flete prepago y llegar en buen estado vendible a fin de calificar para crédito o reemplazo. De lo contrario, SKF no está obligada a aceptar la devolución de ningún producto que haya vendido o distribuido.

AVISO: Los sistemas de numeración de piezas de sus productos son propietarios de SKF. Todo uso incorrecto o no autorizado de estos sistemas de numeración, incluida la adopción o uso de cualquiera de sus números de pieza o listas de números de piezas, incluso cuando el objeto sea la modificación o adición, está estrictamente prohibido y será demandado legalmente por SKF como violación de las leyes de copyright, marcas comerciales y competencia desleal de EE.UU. y otros países. Además, el uso de cualquier marca, nombre o esquema de embalaje comercial, sistemas, colores o diseños de SKF se considera igualmente una violación de los derechos a las marcas, nombres e identidades comerciales de SKF USA y sus afiliadas. La posible violación de ese uso debe ser puesta a la atención de SKF: SKF USA Inc., 890 North State Street, Suite 200, Elgin, Illinois 60123, Attn: Catalog Manager (Gerente de catálogos).

Mode d'emploi du catalogue

Section applications

1. Localisez le constructeur
   - Les constructeurs sont énumérés par ordre alphabétique (consultez l' « Index des constructeurs » ou le numéro de page correct.
2. Localisez le modèle
   - Les modèles sont énumérés dans la section de chaque constructeur
3. Localisez les renseignements concernant votre application

   Les renseignements sur les applications sont énumérés en colonnes pour chaque véhicule dans l'ordre suivant : Roue avant et arrière, Pignon, Différentiel, Embrayage, Boîte-pont, Boîte de transfert et Boîte de vitesses Toutes les autres applications suivent « Boîtes de vitesses » par ordre alphabétique.
4. Localisez l'année
5. Une fois l'application localisée, lire le numéro de stock SKF à droite de l'application.
6. Pour chaque jeu de roulements énuméré, il y aura dessous les éléments qui le composent dans l'ordre Cône/Bague.

   Cela ne s'applique qu'aux Jeux de roulements dont les composants sont disponibles séparément à l'achat.

Codes de notes en bas de page

- En ce qui concerne les Directives de montage sur les Roulements de réparation d'essieu, voir page 5C.

✪ Vérifiez la disponibilité.

✦ Numéro de pièce amélioré pour cette application seulement. Le numéro de pièce original indiqué ci dessus couvre toutes les autres applications.

■ Utilisez le vieux circlip.

✧ Utilisez le numéro de pièce existant jusqu'à épuisement, puis réapprovisionnez en utilisant le nouveau numéro figurant ci-dessous. Voyez les page 4C pour des renseignements particuliers.

▲ N4068 est recommandé pour les embrayages à levier de 12 po.

[ ] Indique les quantités nécessaires. Voyez la page 3C pour les quantités par paquet de roulements à aiguilles.

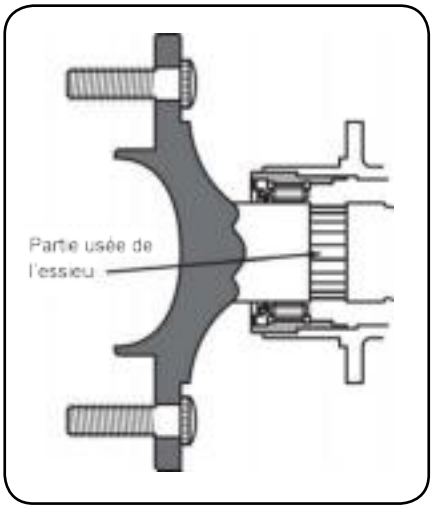
Ensemble de roulements de réparation d'essieu

Certains roulements de roues arrière utilisent l'essieu comme une cage interne, c.-à-d. que les rouleaux du roulement sont en contact direct avec l'arbre de l'essieu. Il s'ensuit que les rouleaux peuvent creuser une gorge dans l'essieu. Jusqu'à présent, la seule solution consistait à remplacer l'essieu proprement dit, démarche onéreuse pour réparer le véhicule. Les essieux usés peuvent désormais être réutilisés en installant un ensemble de réparation de roulement d'essieu.

Il suffit d'installer un ensemble de réparation de roulement d'essieu neuf dans le moyeu de roue. Les rouleaux et le joint du nouvel ensemble de réparation de roulement tourneront alors sur une partie intacte de l'essieu. L'ensemble de réparation de roulement d'essieu remplace à la fois le roulement et le joint traditionnel sans exiger des pièces supplémentaires. Nous fabriquons deux types de ce roulement de réparation. Le type le plus commun est un roulement de réparation scellé simple, graissé par le différentiel. Le second type est un roulement de réparation scellé double. Ce roulement est prélubrifié pour toute sa vie utile et il n'a pas besoin de l'huile du différentiel pour fonctionner.

Six numéros de pièces seulement (R1559, R1561-F, R1561-G, R1563, R57509 et R59047) couvrent les essieux Chrysler, Ford et GM les plus répandus. Chaque ensemble de roulement de réparation est livré prêt au montage pour un service rapide et fiable. Pour plus de commodité, l'ensemble de roulement figure sur une liste de la section applications du présent catalogue. Il suffit de chercher le véhicule en questions, et l'ensemble traditionnel de joint et de roulement et l'ensemble de roulement de réparation d'essieu sont indiqués, s'il y a lieu.

N'oubliez pas de toujours vérifier la profondeur du boîtier du tube d'essieu avant le montage. Comparez cette profondeur à la largeur du roulement de réparation. Certains modèles ont un tube d'essieu rétréci qui ne permet pas d'asseoir le roulement à fond.



Dispositif de garnissage de roulements coniques – BP270

- Le dispositif SKF permet de faire un travail professionnel
- Il permet de maintenir un environnement propre essentiel à la durée de service du roulement
- Il permet l'enlèvement complet de la graisse usée et la mise en place de la graisse neuve
- Le dispositif est doté d'économiseurs de graisse pour les roulements de plus grande taille
- Des instructions complètes sont fournies

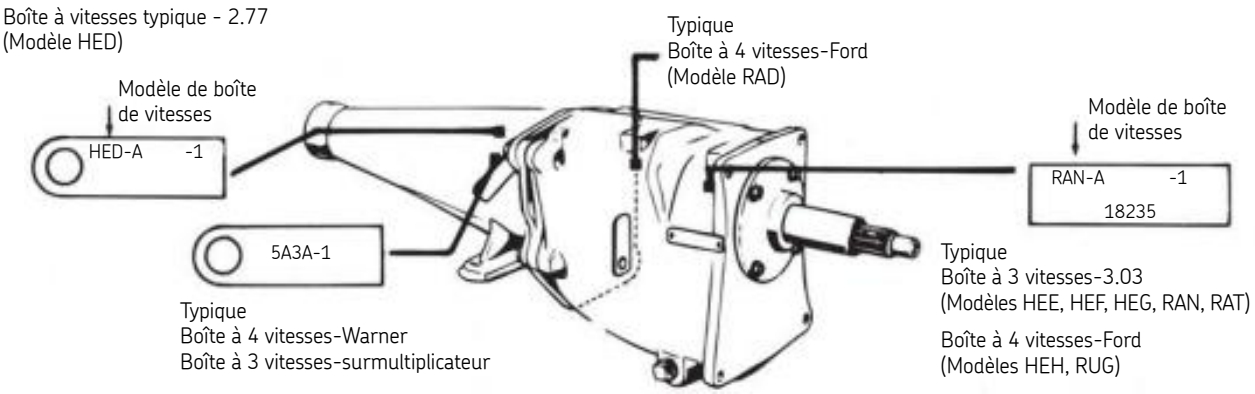
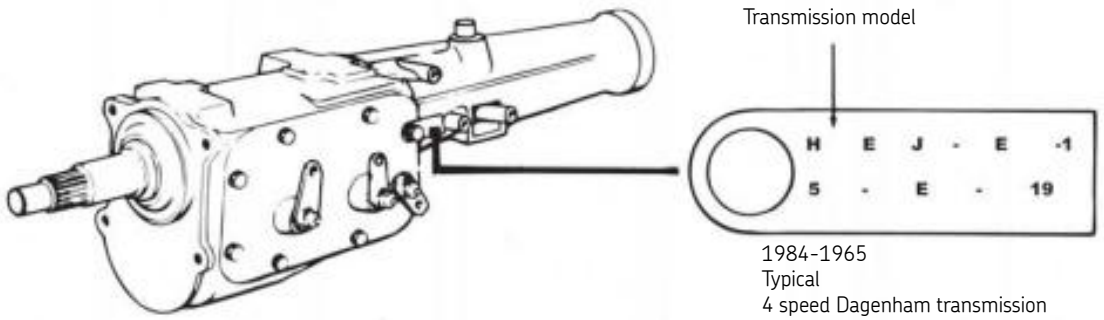
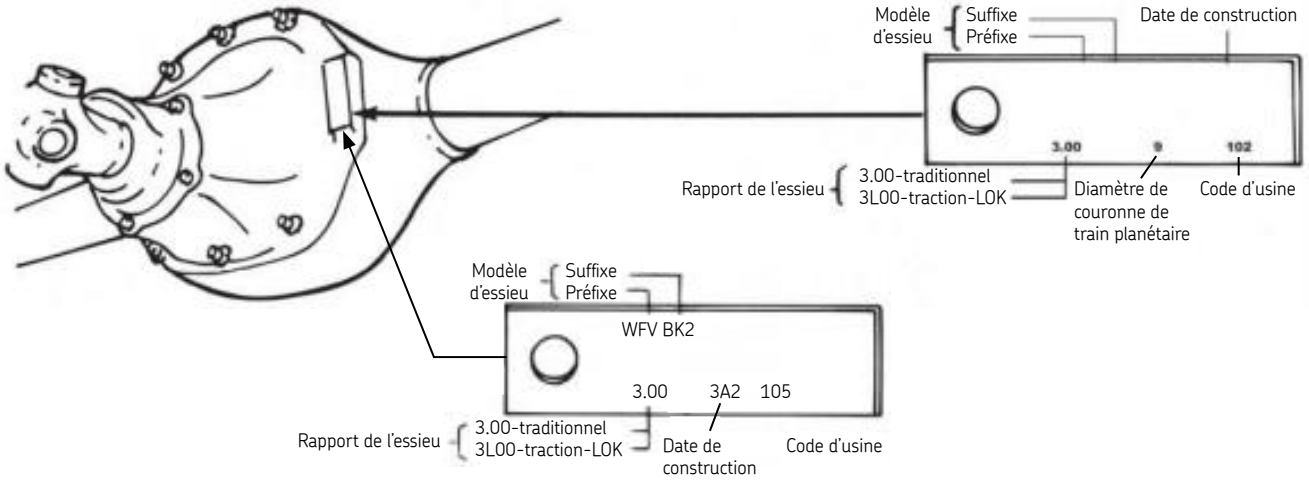
Identification de boîte de vitesses manuelles/boîtes-ponts Ford/Lincoln/Mercury 1995 à 1973



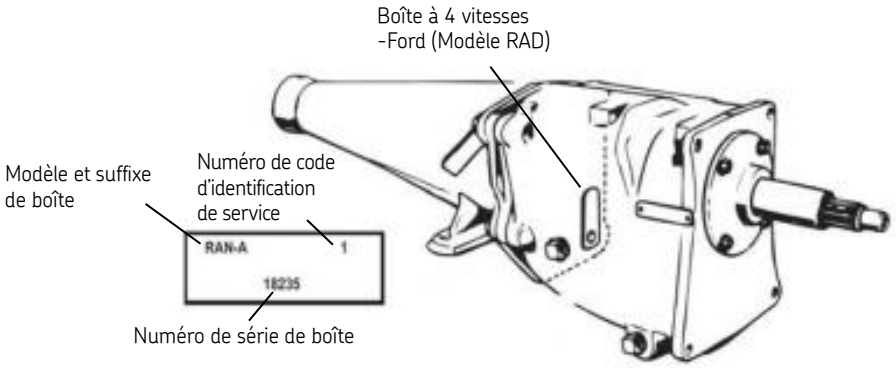


Étiquette d'identification de modèle d'essieu arrière Ford/Lincoln/Mercury

Pour déterminer le bon roulement ou joint à utiliser sur certains produits de la Ford Motor Co, (applications d'essieu arrière et pignon), il faut connaître le modèle de l'essieu. Ce renseignement concernant le modèle d'essieu figure sur une étiquette située sur l'essieu arrière comme cela est illustré ci-dessus.

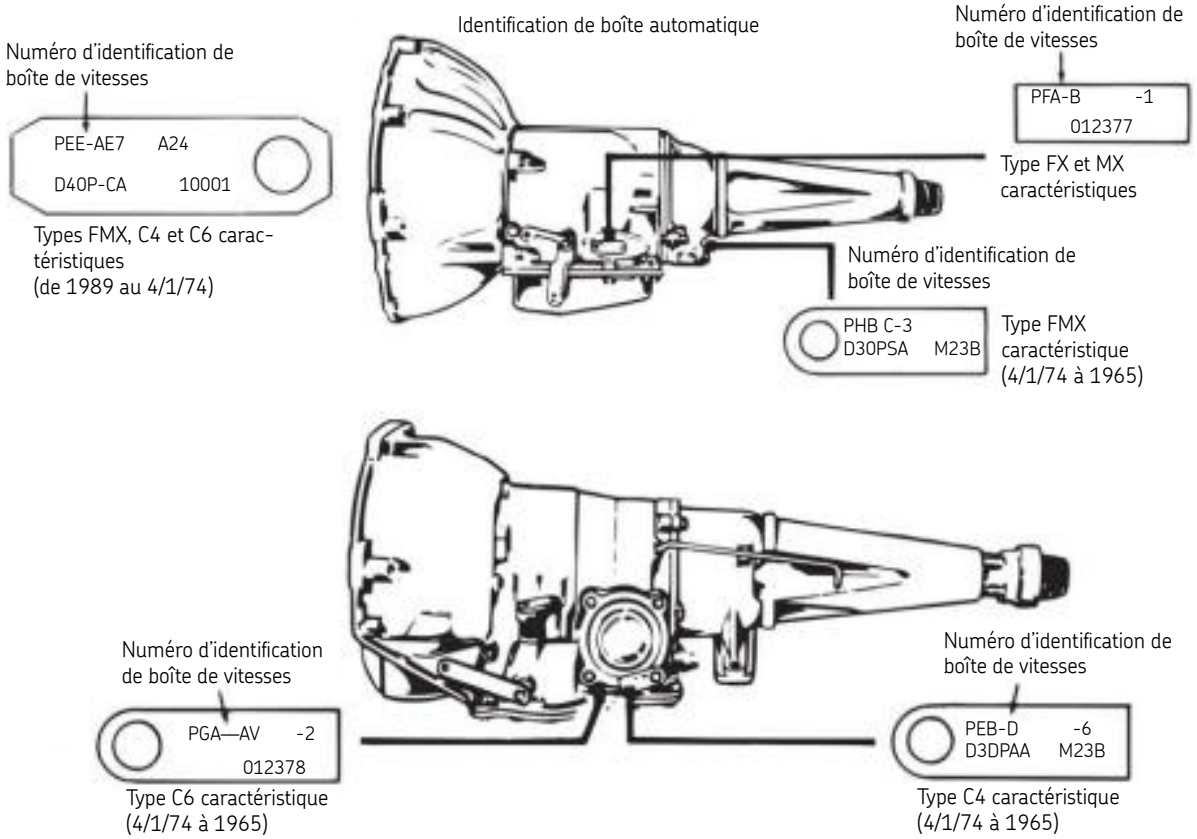


Identification de boîte de vitesses manuelles/boîtes-ponts Ford/Lincoln/Mercury 1995 à 1973

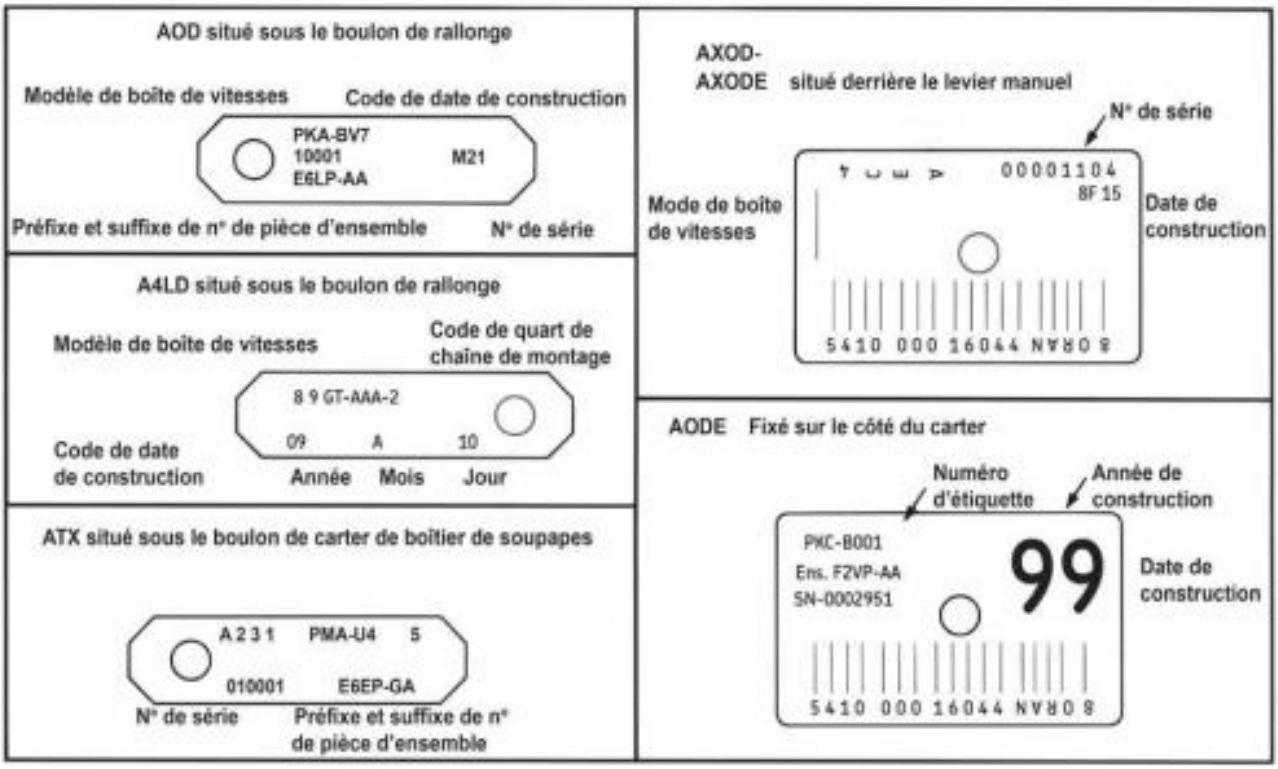


Boîte à 3 vitesses – 3.03 (Modèles RAN, RAT)
Boîte à 4 vitesses – Ford (Model RUG)

Identification de boîte automatique Ford/Lincoln/Mercury 1990 à 1965



Identification des boîtes de vitesses automatiques/ boîtes-ponts Ford/Lincoln/Mercury 1995 à 1991



Identification des boîtes de vitesses automatiques/ boîtes-ponts Ford/Lincoln/Mercury 1995 à 1991

4EAT

Situé sur la boîte-pont

IF4E

Situé sur le haut du carter de boîte-pont

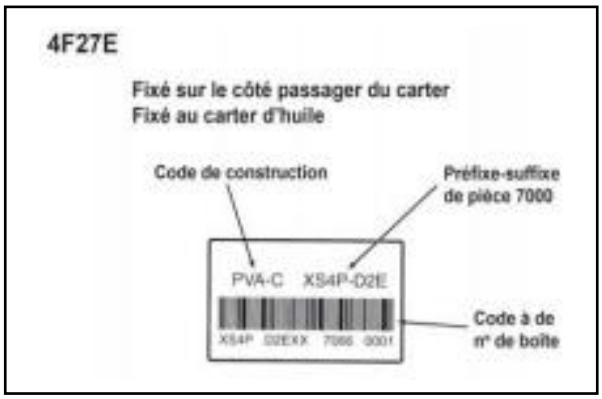
F4E-III

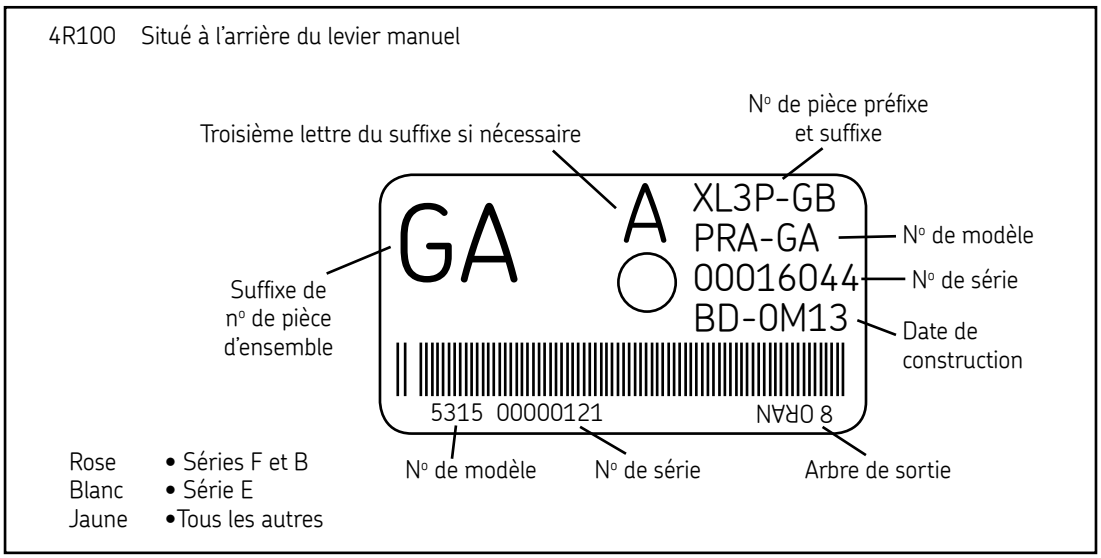
Situé sur le haut du carter de boîte de vitesses

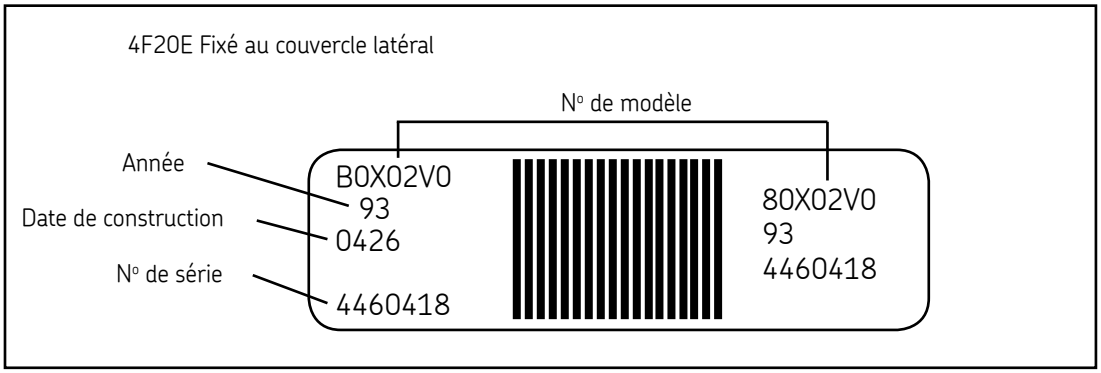
5R55N

Fixé sur le côté passager du carter

Identification des boîtes de vitesses automatiques/ boîtes-ponts Ford/Lincoln/Mercury 1995 à 1991







Codes de moteurs de voitures de tourisme Ford

2008 à 1981 — le 8e chiffre du numéro d'identification de véhicule identifie le moteur
1980 à 1973 — le 5e chiffre du numéro d'identification de véhicule identifie le moteur

* Construction spéciale

Codes de moteurs de camionnettes légères Ford

2008 à 1981 — le 8e chiffre du numéro d'identification de véhicule identifie le moteur
Jusqu'à 1980, inclus — le 4e chiffre du numéro d'identification de véhicule identifie le moteur

Pour convertir les litres en pouces cubes, multipliez par 61,0250

Code	Année	(Moteur) Carburant	(Moteur) Cyl.	Cylindrée unitaire	Notes
5	2007-2008	G	8	330	5,4L - SOHC 24 soupapes
5	1974	G	8	360	2 corps. – Basse compression - D.S.O.
6	2006-2007	G	6	238	3,9L
6	1997-2005	G	8	281	4,6 - SOHC - EFI
7	1998-2002	EV			336V - 75 HP Électrique – Batterie plomb-acide
7	1998				325V - 90 HP Électrique 67 KW – Camionnette Ranger électrique
7	1980-1981	G	8	351	5,8 - 2 corps - Export - D.S.O.
8	2006-2008	G	8	281	4,6L - SOHC 24 soupapes
9	1982-1996	G	6	300	4,9 - 2 corps – Conversion GPL

Codes de boîtes de vitesses automatiques/boîtes-ponts General Motors 1995 à 1991

Buick, Cadillac, Chevrolet tourisme et camionnette, Oldsmobile, Pontiac

Code option	Vitesses	Modèle/Type

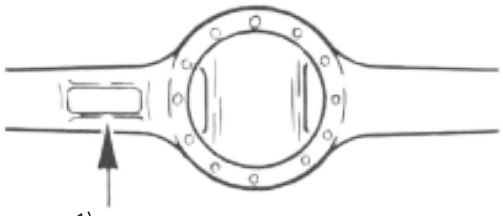
Le code option M13 a 19 boulons de carter d'huile.
Le code option MV4 a 13 boulons de carter d'huile et un carter de 13-1/2 x 12-5/16 po.
Le code option MV9 a 11 boulons de carter d'huile et un carter de 13-3/16 x 11-5/8 po.

Identification des essieux General Motors 1995 à 1991

Buick, Cadillac, Chevrolet tourisme et camionnette, Oldsmobile, Pontiac

Les codes d'essieux GM sont emboutis à l'arrière et sur la gauche du tube d'essieu en lettres de 1/4 po de hauteur à 3 po (7,5 cm) du support, ou sur une plaque métallique fixée à un boulon de couvercle.



LN — Code de pièce

O — Code d'usine de fabrication :

B	Buick (Chevrolet Buffalo voir remarque 2)	M	GM Canada
C	Chevrolet Buffalo	O	Oldsmobile
G	Chevrolet Gear & Axle	P	Pontiac
K	GM Canada St. Catharines (McKinnon)	W	Chevrolet Warren

319 — Date

D — Équipe
(D) Jour
(N) Nuit

E — Identification de différentiel autobloquant à glissement limité :

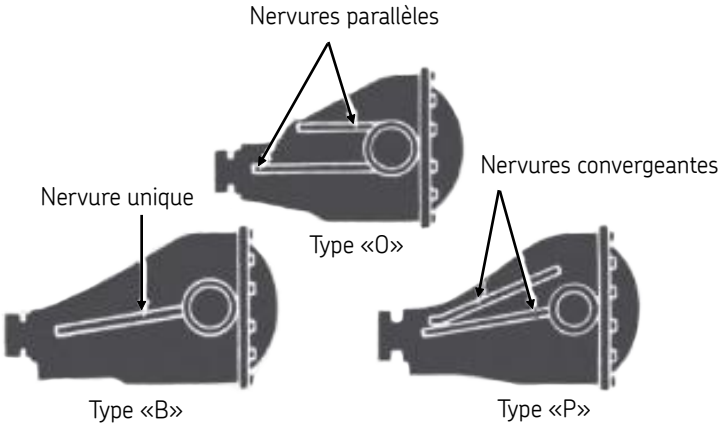
E	Eaton	O	Oldsmobile
G	Chevrolet	W	Borg Warner

(Voir remarque 1)

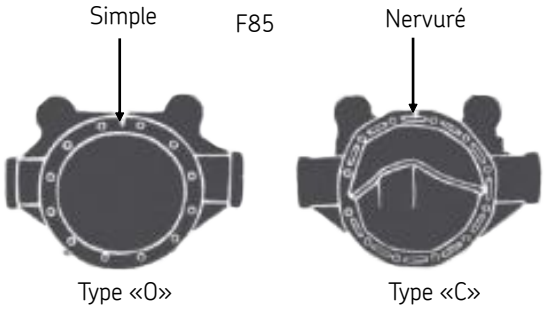
Remarque: (1) Les véhicules de 1978 ont un code d'identification différent de celui qui est illustré plus haut, les caractères 1 à 3 sont les mêmes, toutefois le caractère 4 est l'année, les caractères 5 à 7 sont la date ordinale et le caractère 8 est le caractère d'équipe.

(2) Certains véhicules Chevrolet ont un code à 7 caractères qui contient moins d'informations, les caractères 1 et 3 sont l'identification du véhicule. Les caractères 3 à 6 sont le mois et le jour de production et le caractère 7 est le code de l'usine de fabrication. Sur les véhicules dotés du code à 7 caractères, l'usine B n'est pas Buick, mais Chevrolet Buffalo.

Identification de l'essieu arrière Oldsmobile et F85



Vue latérale—Trompette de pont



Vue arrière—Trompette de pont

Codes de moteurs de voitures de tourisme et camionnettes légères GM

2008 à 1981 — le 8e chiffre du numéro d'identification de véhicule identifie le moteur
1980 à 1976 — le 5e chiffre du numéro d'identification de véhicule identifie le moteur

Informations sur le système de freinage GM

Systèmes de freinage de voitures à carrosserie « A » General Motors (Buick Century, Chevrolet Celebrity, Oldsmobile Ciera, Pontiac 6000) de 1995 à 1991

Les renseignements suivants sont fournis pour permettre l'identification des systèmes de freinage utilisés sur les voitures à carrosserie « A ».
Consultez l'étiquette d'identification des pièces de rechange pour l'identification du système de freinage

Les options « J » offrent les types de freins utilisés par production

Instructions de montage des joints étanches à l'huile

1. Vérifiez l'alésage. — Le bord antérieur doit être ébarbé. Il faut prévoir un coin arrondi ou chanfreiné.

2. Vérifiez l'arbre. — Supprimez les éraflures, barbes, gorges et marques spirales de machine (pas hélicoïdal de machine).

3. Vérifiez le bout de l'arbre. — Supprimez les barbes et les arêtes tranchantes. Le bout de l'arbre doit être chanfreiné dans les applications où l'arbre pénètre dans le joint contre la lèvre d'étanchéité.

4. Vérifiez les cannelures et les rainures de clavettes. — Les arêtes tranchantes doivent être recouvertes d'un manchon de montage graissé, de cales minces ou de ruban pour protéger la lèvre d'étanchéité.

5. Vérifiez les cotes. — Vérifiez bien si les diamètres de l'arbre et de l'alésage correspondent à ceux qui sont spécifiés pour le joint sélectionné.

6. Vérifiez qu'il n'y a pas d'interférence entre les pièces. — Vérifiez qu'aucune autre pièce de machine ne frotte contre le joint et que ce frottement éventuel ne produit pas un échauffement dommageable.

7. Vérifiez le joint. — Il aurait pu être endommagé avant le montage. Une lèvre d'étanchéité retroussée, coupée ou endommagée de toute autre façon doit être remplacée.

8. Vérifiez le sens de montage du joint. — Vérifiez bien si le joint neuf est tourné dans le même sens que le joint d'origine. Généralement la lèvre est du côté du lubrifiant ou du liquide qui doit être retenu.

9. Utilisez les bons outils de montage. — Les outils d'ajustage à la presse doivent avoir un diamètre extérieur inférieur d'environ 0,254 mm (0,010 po) à la dimension de l'alésage. Pour les meilleurs résultats, le centre de l'outil doit être ouvert de sorte que la pression ne soit exercée que sur le bord extérieur.

10. Prélubrifiez l'élément d'étanchéité. Avant le montage, essuyez l'élément avec le lubrifiant retenu.

11. Ne martelez jamais directement la surface du joint. — Utilisez le dispositif de mise en place adéquat, comme un outil à surface molle, une presse à crémaillère une pièce de bois tendre. Exercez la force uniformément sur le bord extérieur du joint pour éviter de le monter de travers.

12. Positionnez le joint adéquatement, vérifiez l'alignement et regardez si le joint n'a pas été endommagé pendant le montage.

Après le montage

1. Si vous peignez l'ensemble, veillez à masquer le joint afin de ne pas mettre de peinture sur la lèvre ou sur l'arbre sur laquelle repose la lèvre. Masquez également les évents afin d'éviter qu'ils ne se bouchent.

2. Si la peinture doit passer au four ou si le mécanisme doit être soumis à la chaleur, il faut veiller à ce que le joint ne soit pas exposé à des températures supérieures à celles qu'il peut tolérer.

3. En cas de nettoyage ou d'essai n'exposez pas les joints à des fluides ou des pressions susceptibles de les endommager.

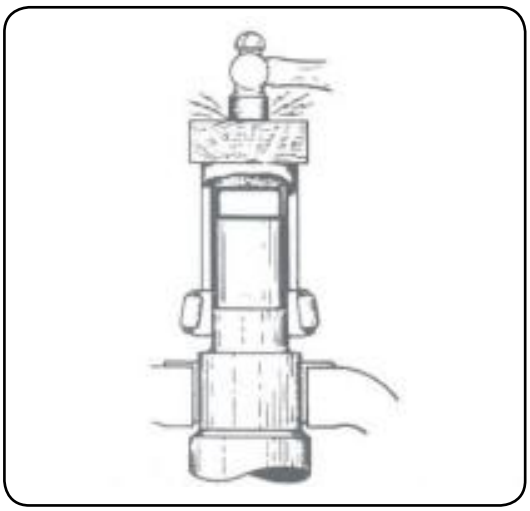
Instructions de montage de roulements

La défaillance prématurée des roulements est souvent causée par des méthodes inadaptées lors de la manipulation ou du montage. Vous trouverez ci-dessous une liste de contrôle qui vous guidera dans le soin adéquat des roulements.

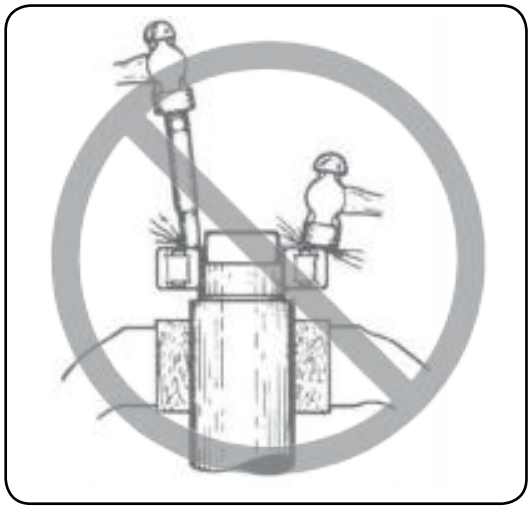
Liste de contrôle du soin des roulements

1. Veillez à ce que l'aire de travail soit propre. Il faut retirer le plus possible de saletés avant d'exposer les roulements.
2. Tous les outils doivent être propres et en bon état.
3. Manipulez toujours les roulements en ayant les mains propres et sèches.
4. Quand vous nettoyez un roulement, n'utilisez jamais une solution de nettoyage contaminée pour le rinçage final.
5. Pour nettoyer et sécher les roulements, utilisez toujours des chiffons propres et non pelucheux.
6. Ne faites pas tourner un roulement avec de l'air comprimé.
7. Recouvrez les roulements neufs ou nettoyés afin de supprimer toute contamination par la saleté ou l'humidité.
8. Les lubrifiants à roulements doivent être propres et conservés dans des récipients clos.
9. Ne nettoyez ou ne lavez pas le lubrifiant d'un roulement neuf.
10. Inspectez et nettoyez l'alésage du boîtier et l'arbre avant de monter un roulement.
11. Lubrifiez le roulement juste avant le montage.

Méthode de montage



1. Exercez toujours la pression de montage contre la bague qui est ajustée à la presse.
2. Utilisez les bons outils quand on monte une cuvette afin d'éviter tout endommagement de la surface du roulement.

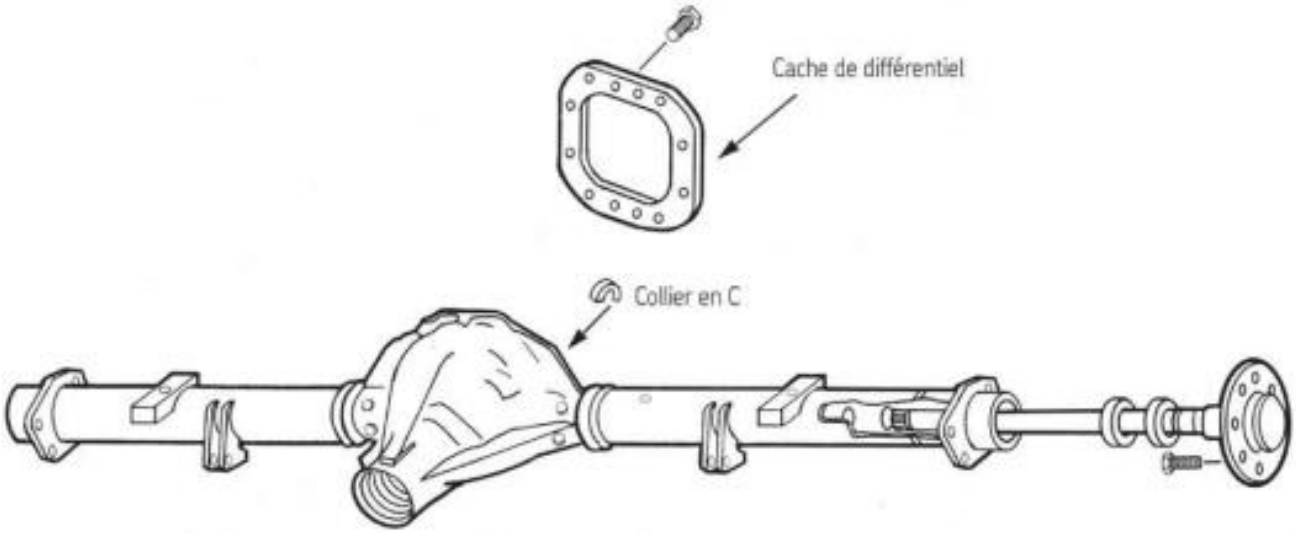


1. Ne martelez jamais directement un roulement ; cela endommagera le roulement et l'arbre.

Essieu semi flottant c. essieu flottant

Essieu semi flottant caractéristique

L'essieu semi flottant caractéristique ne peut pas être démonté sans le cache de différentiel et sans démonter d'abord le collier en C de l'essieu.



Essieu flottant caractéristique

Le fait de tirer l'essieu à travers le centre de la roue et de la jante après avoir démonté les boulons d'enjoliveur démonte les essieux tout flottants caractéristiques. L'essieu semi flottant ne peut pas être démonté sans enlever le cache de différentiel et sans démonter d'abord le collier en C de l'essieu.

WARNING!

Proper selection of the products listed for sale in this catalog is essential to minimize the risk of any seal, bearing or other product failure. Such failures can result in property damage or severe personal injury to operators of machinery, vehicles or to others. You must carefully evaluate the particular application on or into which you intend to install the products. Products in this catalog require installation by an experienced professional mechanic or qualified maintenance professional.

The product properties and operating parameters described in this catalogue are based upon tests conducted by SKF or reported by others. SKF does not assume any responsibility for errors in the data published in this catalog. The life and performance of the products ultimately depend on a number of factors. These include, for example, selection of product design type, selection of materials for their different properties, handling and installation, operating conditions, including shaft surface or bore conditions, the quantity, quality and chemistry of lubricants and other factors. Severe environments can adversely affect product life or performance. For help in realizing longer SKF product life, and optimal performance for your specific application, contact SKF's Customer Services Department at 1-800-882-0008.

LIMITED WARRANTY

SKF warrants to the first purchaser that the products sold by it, when properly installed, will be free from defects in material and workmanship. SKF's sole obligation and liability for any defect found to exist contrary to this limited warranty in a product sold by SKF, and purchaser's sole and exclusive remedy for such defect, shall be limited to: (A) SKF furnishing without additional charge to purchaser, including transportation, a replacement for any of the products sold by SKF which are found by SKF to be defective contrary to this limited warranty, and (B) in the case of products which cannot be repaired or replaced by SKF, SKF shall credit or refund to purchaser the purchase price paid therefore; provided, that SKF is advised in writing of such product non-conformance within thirty (30) days of the date of discovery thereof, and that the non-conforming product is returned f.o.b. to SKF's designated warehouse promptly thereafter, but in any case not later than twelve (12) months (twenty-four (24) months only in the case of light duty hub unit products) from the date of purchase. In no event shall SKF be obligated under this limited warranty or otherwise in any way whatsoever for normal wear and tear, or for any products sold by SKF which, after delivery by SKF and in SKF's sole determination, have been subjected to accident, abuse, misapplication, improper or faulty repair or installation, improper or faulty maintenance or lubrication, any alteration or neglect, excessive loading or other excessive operating conditions, or for defects caused by or resulting from purchaser's specifications or designs or otherwise caused by purchaser. TO THE FURTHEST EXTENT PERMITTED UNDER APPLICABLE LAW, SKF DISCLAIMS LIABILITY, IN TORT OR CONTRACT, IN NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, FOR ANY OTHER REMEDY OR DAMAGE, WHETHER DIRECT OR INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL WITH RESPECT TO ITS PERFORMANCE HEREUNDER, INCLUDING WITHOUT LIMITATION THE PRODUCTS SOLD OR PROVIDED HEREUNDER BY SKF, AND ITS PROVISION OF ANY RELATED SERVICES. THIS LIMITED WARRANTY IS TO THE EXCLUSION OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. COSTS INCURRED FOR ROUTINE MAINTENANCE ARE NOT COVERED BY THIS LIMITED WARRANTY. Without limiting the generality of the foregoing, SKF specifically disclaims liability to purchaser for any loss, cost, or damage incurred as a result of equipment downtime, or loss of use or availability of worksite, lost revenues or lost profits, regardless of whether SKF is on notice of the possibility of such damage or loss and did or could have anticipated same. No other person has been authorized by SKF to undertake or make on behalf of SKF any further representation, warranty or guarantee in addition to or contrary to this limited warranty or contrary to the limitations and disclaimers provided herein. The exclusive remedies provided in this limited warranty shall not be deemed to have failed of their essential purpose so long as SKF is willing and able to perform to the extent and in the manner prescribed in this limited warranty.

SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. This limited warranty gives you specific legal rights, and you may also have other rights, which vary state to state.

INFORMATION AND RETURNS: This catalog refers to products as designed prior to its publication, and does not cover product changes made after its publication date. Inquiries can be directed to: SKF Customer Service Department, 890 North State Street, Suite 200, Elgin, IL 60123, or call 1-800-882-0008. Any error in shipment (for over-shipments in the quantity of product or for product not matching purchaser's description given in its order) is returnable for credit or replacement by SKF, provided that SKF is advised in writing by purchaser of such non-conformance within 30 days after the product's delivery to purchaser, and only after written authorization therefore is given by SKF. Approved returns must be shipped freight prepaid and arrive in good, saleable condition to qualify for credit or replacement. SKF shall not otherwise be obligated to accept the return of any products sold or distributed by it.

NOTICE: The SKF part numbering systems for the SKF products are proprietary to SKF. Any improper or unauthorized use of these numbering systems, including adoption or use of any of their part numbers or part number lists, even where the subject of modification or addition, is strictly prohibited and will be prosecuted by SKF as a violation of U.S. and foreign copyright, trademark and unfair competition laws. In addition, use of any SKF trademarks, trade names or packaging schemes, systems, colors or designs is likewise considered a violation of the trademarks, trade names and trade identities rights of SKF USA Inc. and their affiliates. Possible violation of such use should be brought to the attention of SKF: SKF USA Inc., 890 North State Street, Suite 200, Elgin, Illinois 60123, Attn: Catalog Manager.

AVERTISSEMENT!

La bonne sélection des produits vendus dans ce catalogue est essentielle pour minimiser les risques de défaillance des joints, roulements et autres produits. De telles défaillances peuvent entraîner des dégâts matériels ou des lésions corporelles graves aux opérateurs de machines, véhicules ou autres. Il faut évaluer soigneusement l'application particulière sur laquelle ces produits doivent être montés. Les produits de ces catalogues exigent un montage par un mécanicien professionnel expérimenté ou un professionnel qualifié de l'entretien.

Les propriétés et les paramètres de fonctionnement décrits dans le présent catalogue sont basés sur des essais conduits par SKF ou d'autres. SKF rejette la responsabilité de toute erreur dans les données contenues dans le présent catalogue. La durée de service et le rendement des produits dépendent d'un certain nombre de facteurs. Parmi ceux-ci : la sélection du type de conception de produit, la sélection des matériaux pour leurs différentes propriétés, la manutention et le montage, y compris les états des surfaces d'arbres ou des alésages, la quantité, la qualité et la nature chimique des lubrifiants et d'autres facteurs encore. Les milieux hostiles peuvent influer négativement sur la durée de service et le rendement des produits. Pour assurer une plus grande longévité des produits SKF et un rendement optimal pour votre application spécifique, se mettre en rapport avec le Customer Service Department (service après-vente) de SKF au 1-800-882-0008.

GARANTIE LIMITÉE

SKF garantit à l'acheteur initial que les produits vendus seront, dans la mesure où ils sont adéquatement montés, exempts de vices de matière et de façon. La seule obligation et responsabilité concernant tout vice contraire à la présente garantie limitée existant dans un produit vendu par SKF, et le seul recours exclusif de l'acheteur en ce qui concerne un tel vice se limitera à : (A) la fourniture par SKF à titre gratuit pour l'acheteur, y compris en ce qui concerne le transport, d'une pièce de rechange pour tout produit vendu par SKF dont SKF aura déterminé qu'il est défectueux contrairement à la présente garantie limitée et (B) dans le cas où le produit ne peut être réparé ou remplacé par SKF, SKF accordera un avoir ou un remboursement pour la non-conformité dudit produit dans les 30 jours suivant la date de découverte de la défaillance et dans le mesure ou le produit non conforme est retourné à l'entrepôt désigné de SKF franco à bord, mais en aucun cas plus de 12 mois après la date d'achat (vingt-quatre (24) mois dans le cas de produits d'unité de moyeu de camionnette légère). SKF ne sera en aucun cas obligé au titre de la présente garantie limitée ou autrement et d'aucune façon pour ce qui est de l'usure normale de tout produit vendu par SKF dont, après la livraison par SKF et à la seule discrétion de SKF, aura fait l'objet d'un accident, d'une usage abusif, d'une mauvaise application d'une réparation ou d'un montage impropre ou défectueux, d'une charge excessive ou d'autres conditions de fonctionnement excessives, ou du fait de vices causés ou résultant des spécifications ou conceptions de l'acheteur ou causés par l'acheteur de toute autre façon. **DANS LE PLUS GRANDE MESURE PERMISE PAR LA LOI, SKF REJETTE LA RESPONSABILITÉ, EN DROIT DE LA RESPONSABILITÉ CIVILE DÉLICTUELLE OU EN DROIT CONTRACTUEL, EN NÉGLIGENCE, RESPONSABILITÉ STRICTE, OU AUTRE, DE TOUTE AUTRE RECOURS OU DOMMAGES, DIRECTS OU INDIRECTS, ACCESSOIRES, SPÉCIAUX, EXEMPLAIRE, OU CONSÉCUTIFS EN CE QUI CONCERNE SA PERFORMANCE AU TITRE DES PRÉSENTES, Y COMPRIS SANS LIMITATION LES PRODUITS VENDUS OU FOURNIS CI-DEDANS PAR SKF, ET SA PRESTATION DE TOUT SERVICE ANNEXE. LA PRÉSENTE GARANTIE LIMITÉE EXCLUE TOUTE AUTRE GARANTIE, EXPRESSE OU IMPLICITE, Y COMPRIS LES GARANTIES DE VALEUR MARCHANDE OU D'ADAPTATION À UNE FIN PARTICULIÈRE. LES COÛTS ENCOURUS POUR L'ENTRETIEN PROGRAMMÉ NE SONT PAS COUVERTS PAR LA PRÉSENTE GARANTIE LIMITÉE.** Sans limiter le caractère général de ce qui précède, SKF rejette spécifiquement toute responsabilité envers l'acheteur pour toute perte, coût ou dommage résultant du temps d'immobilisation du matériel, ou de la perte d'usage ou de disponibilité de chantier, les recettes ou bénéfices perdus, que SKF soit informé ou non de la possibilité de tels dommages ou pertes ou aurait pu prévoir ces derniers. Aucun personne n'a été autorisée par SKF à entreprendre ou à faire de la part de SKF des déclarations de garantie allant au delà ou contraires à la présente garantie limitée ou contraire aux limitations et dénis de responsabilité énoncés ci-dedans. Les recours exclusifs prévus dans la présente garantie limités ne seront pas considérés comme ayant manqué à leur objet essentiel dans la mesure où SKF est disposé et capable de remplir ses obligations dans la mesure et de la façon prescrite dans la présente garantie limitée.

CERTAINS ÉTATS NE PERMETTENT PAS DE LIMITATIONS QUANT À LA DURÉE DE TOUTE GARANTIE IMPLICITE OU QUANT À L'EXCLUSION OU LA LIMITATION DE DOMMAGES ACCESSOIRES OU CONSÉCUTIFS, LES EXCLUSIONS CI-DESSUS PEUVENT DONC NE PAS S'APPLIQUER À VOUS. La présente garantie limitée vous confère des droits légaux spécifiques et vous pouvez avoir d'autres droits, qui varient d'un état à l'autre.

RENSEIGNEMENTS ET RETOURS : Le présent catalogue fait référence à des produits conçus avant sa publication et ne couvre pas les modifications de produits effectuées après sa date de publication. Les demandes de renseignements peuvent être adressées à : SKF Customer Service Department, 890 North State Street, Suite 200, Elgin, IL 60123, ou appeler 1-800-882-0008. Toute erreur d'expédition (pour les expéditions de quantité excessives de produits ou de produits ne correspondant pas à la description donnée par l'Acheteur dans sa commande) peut faire l'objet d'un retour contre un avoir ou un remplacement par SKF, dans la mesure où SKF aura été notifié par écrit par l'acheteur de ladite non-conformité dans les 30 jours suivant la livraison du produit à l'acheteur, et seulement après autorisation écrite donnée par SKF. Les retours agréés doivent être expédiés tous frais payés et arriver en bon état propre à la revente pour donner droit à un avoir ou un remplacement. Autrement, SKF ne sera pas tenu d'accepter le retour de tout produit vendu ou distribué par la société.

AVIS : Les systèmes de numérotation des pièces SKF pour les produits SKF sont la propriété exclusive de SKF. Tout utilisation non autorisée ou inadéquate de ces systèmes de numérotation, y compris l'adoption ou l'utilisation de tout numéro de pièces ou de listes de numéros de pièces, même dans un but de modification or d'ajout, est strictement interdit et sera poursuivi par SKFcomme une contravention aux droits de propriété, à la protection des marques de commerce et un acte de concurrence déloyale aux Etats-Unis comme à l'étranger. En outre, l'utilisation des marques de commerces, des noms commerciaux ou des motifs de conditionnement, systèmes, couleurs ou conceptions SKF sera de même considérée comme une contravention aux droits sur les marques de commerce, noms commerciaux et identité commerciale de SKF USA et de son groupe. Les éventuelles contraventions à ces droits devront être signalées à SKF : SKF USA Inc., 890 North State Street, Suite 200, Elgin, Illinois 60123, Attn: Catalog Manager.

MFG./YEAR MODEL & LOCATION PART NO.

Wheel Rear (Cont.)

1995-1987 C, K, P, R & V Series w/10.50" Ring Gear:
Seal **28426**
Seal Kit **28446**
Bearing (Inner) **387-AS/382-A**
Bearing (Outer) **BR38**
(Set Components) *LM104949/LM104911*

1995-1988 C & K Series w/9.50" Ring Gear:
Seal **17005**
Bearing **R1561-TV**
(Axle Repair Brg. Assy.) ..... • *R1561-G*

1991-1987 R & V Series w/9.50" Ring Gear:
Seal **17053**
Bearing **R1561-TV**
(Axle Repair Brg. Assy.) ..... • *R1561-G*

1986-1981 9.50" Ring Gear:
Seal **17053**
Bearing **R1561-TV**
(Axle Repair Brg. Assy.) ..... • *R1561-G*

1986-1973 10.50" Ring Gear:
Seal **28426**
(Speedi-Sleeve/Seal Kit) *28446*
Bearing (Inner) **387-AS/382-A**
Bearing (Outer) **BR38**
(Set Components) *LM104949/LM104911*

1972-1965 Spicer 60 Axle:
Seal **23844**
Bearing (Inner) **BR28678/BR28622**
Bearing (Outer) **BR18690/BR18620**

1972-1946 w/o Spicer Axle:
Seal **28426**
(Speedi-Sleeve/Seal Kit) *28446*
Bearing (Inner) **KD11786-Y**
(Set Components) *388-A/BR382*
Bearing (Outer) **KB11630-Z**
(Set Components) *368-S/BR362*

1947 250 Model w/H.D. Axle:
Bearing (Inner) **388-A/383-A**

1946 280 Model:
Bearing (Inner) **395-S/394-A**
Bearing (Outer) **KB11786-Y**
(Set Components) *BR387/BR382*

1946 250 Model w/o H.D. Axle:
Seal (Inner) **28464**
Bearing (Inner) **368-A/362-A**
Bearing (Outer) **359-S/354-A**

Pinion

Front Axle

1995-1988 K Series w/8600 lb. G.V.W.:
Seal **19428**
(Speedi-Sleeve) *99193*
Bearing (Front) **HM804846/HM804810**
Bearing (Rear) **HM88649/HM88610**

1991-1987 V Series:
Seal **19277**
(Speedi-Sleeve) *99193*
Bearing (Front) **BR52**
(Set Components) *M88048/M88010*
Bearing (Rear) **M802048/M802011**

Pinion (Cont.)

Front Axle (Cont.)

1986-1977 4 W/D Exc. Spicer Axle:
Seal **19277**
(Speedi-Sleeve) *99193*
Bearing (Front) **BR52**
(Set Components) *M88048/M88010*
Bearing (Rear) **M802048/M802011**

1980-1960 4 W/D w/Spicer Axle:
Seal **15788**
(Speedi-Sleeve) *99155*
Bearing (Front) **BR02872/BR02820**
Bearing (Rear) **BR31594/BR31520**

1959-1956 4 W/D FH035 Axle:
Seal **25970**
(Speedi-Sleeve) *99259*
Bearing (Front) **MU5206UM26**
Bearing (Rear) **A1011**

Rear Axle

1995-1988 10.50" Ring Gear & 1st Design w/Cooling Fins On Drums:
Seal **21955**
(Speedi-Sleeve) *99220*
Bearing (Front) **M802048/M802011**
Bearing (Pilot) **R1581-TV**
Bearing (Rear) **HM903249/HM903210**

1995-1981 9.50" Ring Gear 1st Design:
Seal **19314**
(Speedi-Sleeve) *99193*
Bearing (Front) **HM88649/HM88610**
Bearing (Rear) **HM804846/HM804810**

1988-1986 C, K, R & V Series w/10.50" Ring Gear & 1st Design w/o Cooling Fins On Drums:
Seal **21955**
Bearing (Front) **M802048/M802011**
Bearing (Pilot) **R1581-TV**
Bearing (Rear) **HM803149/HM803110**

1985 C, K & P Series w/10.50" Ring Gear w/o Dana Axle:
Seal **21955**
Bearing (Front) **M802048/M802011**
Bearing (Pilot) **DC57524**
Bearing (Rear) **HM803149/HM803110**

1984-1973 10.50" Ring Gear:
Seal **21955**
Bearing (Front) **M802048/M802011**
Bearing (Pilot) **R1581-TV**
Bearing (Rear) **HM803149/HM803110**

1972-1968 H052 & H072 Axles:
Seal **25970**
(Speedi-Sleeve) *99259*
Bearing (Front) **A1011**
Bearing (Rear) **M5205-UV**

Chrysler (FWD) E Class/New Yorker (1993-83), Imperial/5th Ave., Laser (thru 1986), LeBaron (from 1982), TC, Town & Country (1988-1983)

MFG./YEAR | MODEL & LOCATION | PART NO.

Wheel Front

1995-1991 All:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Hub Assembly **BR930013**

1990-1989 LeBaron w/14" Whls.:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Bearing **B42**
- Hub Assembly **BR930002**

1990-1989 LeBaron w/15" & 16" Whls.:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Hub Assembly **BR930013**

1990-1989 Imperial/5th Ave. & New Yorker:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Hub Assembly **BR930013**

1989 TC3:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Bearing **B42**

1988-1984 All:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Bearing **B42**
- Hub Assembly (4 Bolt) **BR930001**
- Hub Assembly (5 Bolt) **BR930002**

1983-1982 All:
- Seal **21952**
- Seal (w/Sleeve) **21962**
- Bearing **B39**
- Hub Assembly **BR930000**

Wheel Rear

1995-1983 All:
- Seal **16599**
- Bearing (Inner) **BR39**
- Bearing (Outer) **BR16**
- *(Set Components)* *LM12749/LM12711*

1982 All:
- Seal **14848**
- Bearing (Inner) **BR4**
- *(Set Components)* *L44649/L44610*
- Bearing (Outer) **BR2**
- *(Set Components)* *LM11949/LM11910*

Differential

Kit

1989-1981 7.25 " Ring Gear:
- Standard Seal and Bearing Kit Rear **SDK302**

1989-1981 8.25 " & 8.375 " Ring Gear:
- Standard Seal and Bearing Kit Rear **SDK303**
- Master Seal and Bearing Kit Rear **SDK303-MK**

1981 9.25 " Ring Gear:
- Standard Seal and Bearing Kit Rear **SDK304**
- Master Seal and Bearing Kit Rear **SDK304-MK**

Clutch

Release

1993-1990 All:
- Bearing Assembly **N4122**

1989 TC:
- Bearing Assembly **N4005-SA**

Clutch (Cont.)

Release (Cont.)

1989-1986 Exc. '89 TC:
- Bearing Assembly **N3013-SA**

1985-1982 All:
- Bearing Assembly **N3013-SA**

Transaxle-Automatic

Differential

1995-1982 All:
- Bearing ..... [2] **BR11**
- *(Set Components)* *JL69349/JL69310*

Front Pump

1995-1991 All:
- Seal **14939**
- *(Speedi-Sleeve)* *99149*

1990-1982 All:
- Seal **15022**
- *(Speedi-Sleeve)* *99149*

Output Shaft

1995-1981 All:
- Seal **15750**
- *(Speedi-Sleeve)* *99157*

Shift Shaft

1995-1981 All:
- Seal **8017**

Transaxle-Manual

Differential

1992-1982 All:
- Bearing ..... [2] **BR11**
- *(Set Components)* *JL69349/JL69310*

Input Shaft

1992-1982 All:
- Seal **10583**
- *(Speedi-Sleeve)* *99106*
- Bearing (Front) **BR4**
- *(Set Components)* *L44649/L44610*
- Bearing (Rear) **BR5**
- *(Set Components)* *LM48548/LM48510*

Output Shaft

1992-1981 All:
- Seal **15750**
- *(Speedi-Sleeve)* *99157*

Shift Shaft

1983-1981 All:
- Seal **7000**
- *(Speedi-Sleeve)* *99082*

Alternator

1989 Bosch 40 & 90 Amp.:
- Bearing (Front) **6203-2RSJ**
- Bearing (Rear) **6201-2RSJ**

1989 Nippondenso 50 & 120 Amp.:
- Bearing (Front) **AB1**

1989-1988 Chrysler 40, 50, 90 & 120 Amp.:
- Bearing (Rear) **6203-2RSJ**

1989-1988 Nippondenso 40 & 90 Amp. w/o Pulley No. 5233772 & 5233843:
- Bearing (Front) **AB1**

1955-1953 Rockwell Std. B150 Axle:
- Seal **12456**
- *(Speedi-Sleeve)* *99125*
- *(Speedi-Sleeve/Seal Kit)* *480125*

1955-1952 Rockwell Std. A150 Axle:
- Seal **18922**
- *(Speedi-Sleeve)* *99187*

1950-1948 Rockwell Std. 53566 Axle:
- Seal **13738**
- *(Speedi-Sleeve)* *99138*

Differential

Kit

1995-1988 Dana 80 Axle:
- Standard Seal and Bearing Kit Rear **SDK337**

1995-1985 10.25 " Ring Gear:
- Standard Seal and Bearing Kit Rear **SDK314**
- Master Seal and Bearing Kit Rear **SDK314-MK**

1995-1980 Dana 50 Axle:
- Standard Seal and Bearing Kit Front **SDK336**

1995-1979 Dana 60 Axle:
- Standard Seal and Bearing Kit Front **SDK331**

1995-1972 Dana 70HD Axle:
- Standard Seal and Bearing Kit Rear **SDK332-HD**

1995-1960 Dana 60/61 Axle:
- Standard Seal and Bearing Kit Rear **SDK331**

1985-1981 Dana 44 Axle:
- Standard Seal and Bearing Kit Front **SDK339-B**

1983-1961 Dana 70 Axle:
- Standard Seal and Bearing Kit Rear **SDK332**

Front Axle

1995-1979 Spicer 60 Axle:
- Bearing ..... [2] **387-A/382-S**

1985-1983 Spicer 50 Axle From 3/83:
- Bearing (Inner) ..... [2] **JLM104948/LM104911-A**
- Bearing (Outer) **R1563-TAV**

1983-1980 Spicer 50 Axle Thru 2/83:
- Bearing (Inner) ..... [2] **JLM104948/LM104911-A**
- Bearing (Outer) **BR9**

1981 Spicer 44 Axle:
- Bearing (Inner) ..... [2] **BR25590/BR25523**
- Bearing (Outer) **BR9**

Rear Axle

1995-1986 All:
- Bearing **BR469/453-X**

1985-1980 Spicer 60, 70B & 70U Axles:
- Bearing ..... [2] **387-A/382-S**

1985-1980 Spicer 70 H.D. Axle:
- Bearing ..... [2] **BR469/453-X**

Differential (Cont.)

Rear Axle (Cont.)

1979-1961 Spicer 60 & 70 Axles:
- Bearing ..... [2] **387-A/382-S**

1962-1957 Rockwell Std. B100 & B140 Axles:
- Bearing (L.H.) **SET407**
- *(Set Components)* *BR28682/BR28622*
- Bearing (R.H.) **387-A/BR382**

Clutch

Pilot

SPEEDI-SLEEVE shaft repair kits

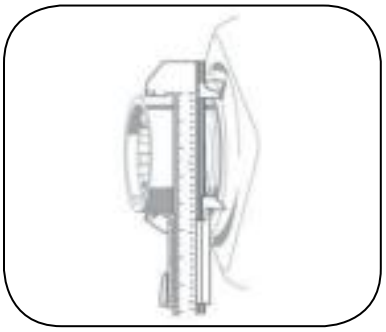
Go from scored to restored in less than 5 minutes!
The SKF SPEEDI-SLEEVE is a fast and effective way to refinish worn shaft. It's quicker than remetalizing or regrinding, and provides an improved sealing system. The outside surface of an SKF SPEEDI-SLEEVE forms an ideal sealing surface. Many popular regrinding and refinishing techniques produce a surface that cannot be properly sealed.

The standard range of SKF SPEEDI-SLEEVE sizes covers shaft diameters from .472" to 8" (12 mm to 200 mm). The SKF SPEEDI-SLEEVE is thin-walled, 0.011" (0,28 mm), and made of high quality stainless steel. The contact surface is wear-resistant with a finish of R_a 10 to 20 µin (0,25 to 0,5 µm). No expensive machining or preparation is required before mounting. Downtime is reduced since installation only takes a few minutes.

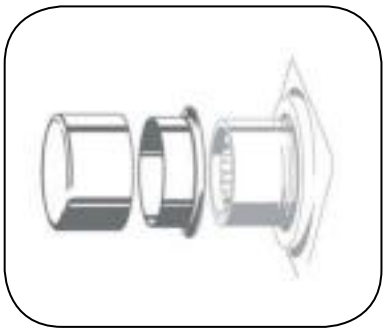
While installation is simple, it must be done with care in order to assure proper results. An installation tool is packaged with every sleeve.

Ask your SKF sales representative for more information about SKF SPEEDI-SLEEVE, including SKF SPEEDI-SLEEVE Gold for extra abrasive, high-contamination environments and recommended when combined with a fluororubber material.

Major steps for installing a new SKF SPEEDI-SLEEVE.



Clean and measure the diameter of the worn shaft and mark the area where the sleeve will cover the scored portion of the shaft.



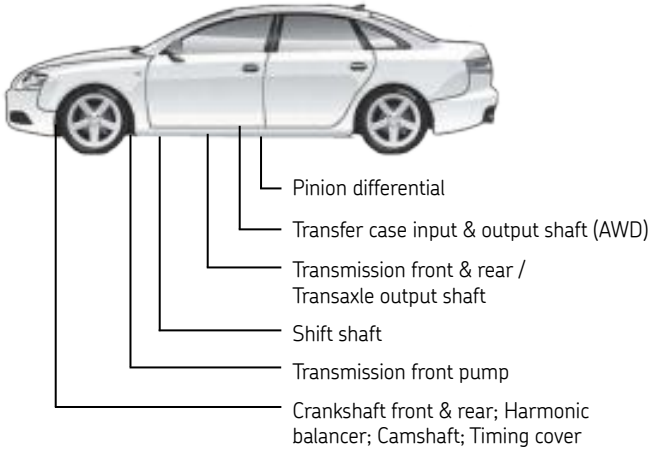
Place SKF SPEEDI-SLEEVE on to the shaft and then place special installation tool over the sleeve.

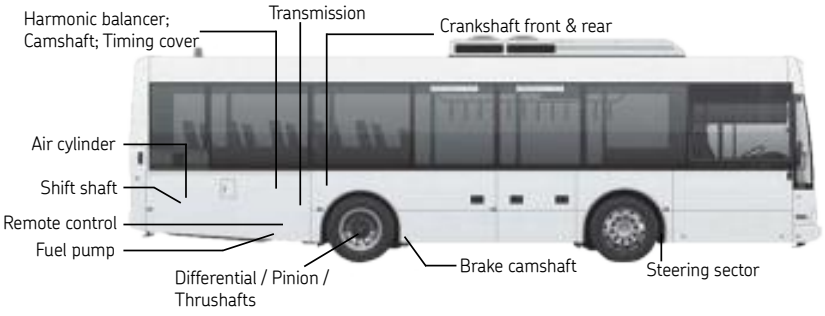
Tap installation tool with mallet until sleeve is seated on shaft over the marked area. Remove installation tool.*

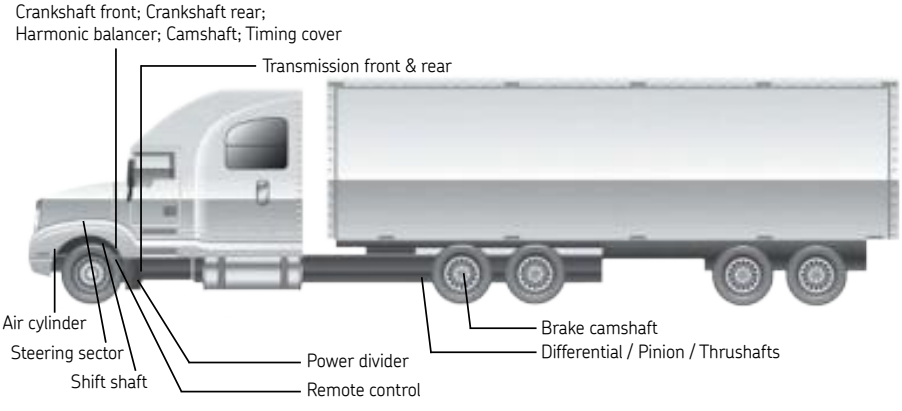
* Note: In certain applications, the flange will need to be removed. Please check instructions that are included with each SPEEDI-SLEEVE or SPEEDI-SLEEVE Gold to avoid damage.

Applications

The SKF SPEEDI-SLEEVE can be used on most worn shafts. The illustrations shown here suggest just a few of the most popular applications.







SPEEDI-SLEEVE installation instructions

From scored to restored in a few minutes

Although installation is simple, it should be done carefully to achieve the best results.

Before starting, the sealing zone on the shaft should be carefully cleaned and any burrs or rough spots should be filed down and polished. Deep wear grooves, scratches or very rough surfaces should be treated with a suitable powdered metal epoxy filler. The sleeve must be positioned on the shaft before the filler has hardened.

It should also be noted that although SPEEDI-SLEEVES can be easily installed within minutes on most shafts, **they should not be placed over splines or keyways etc. on the shaft.** As the thin-walled sleeve has an interference fit, any disturbances on the shaft surface may create a similar pattern on the sleeve surface and the seal will leak.

Choosing the right size

To determine the appropriate sleeve size it is first necessary to clean the shaft carefully. The diameter of an undamaged section of the seal counterface should then be measured in at least three different planes. The arithmetical mean of these measurements is used to choose a SPEEDI-SLEEVE. If the value lies within the permissible range shown in the product table for the shaft diameter then the SPEEDI-SLEEVE will have an adequately tight fit on the shaft. The sleeve cannot turn on the shaft and no adhesive is required.

If no suitable sleeve is listed in the product table, then it will be necessary to rework the shaft to an appropriate dimension. This will also mean that a new size of seal will be required. If production quantities are viable, SKF will also make tailored sleeves.

SKF SPEEDI-SLEEVE installation

Note: If you can catch your fingernail in a seal wear track or shaft groove, a repair sleeve should be installed to prevent leakage.

1. Clean the shaft where the seal contacts the shaft. File down and polish any burrs or rough spots.

2. Measure the diameter where the sleeve will be positioned on an unworn portion of the shaft. Measure in three positions and average the readings (to insure the shaft is within recommended specifications). If the average diameter is within the range for a given sleeve size, there is sufficient press-fit built into the sleeve to prevent it from sliding or spinning without the need for cement adhesive.

3. Determine how far back the sleeve must be positioned to cover the old seal wear track. Measure to the exact point, or mark directly on the surface. The sleeve must be placed over the worn area, not just bottomed or left flush with the end of the shaft.

4. Shallow wear grooves do not require filling. Optionally, a light layer of non-hardening sealant can be applied to the inner surface of the sleeve. Clear away sealant that migrates to the outer sleeve surface.

5. If the shaft is deeply scored, (see note above) fill the groove with powdered metal epoxy type filler.* Install the sleeve before the filler hardens, allowing the sleeve to "wipe" off any excess filler. Clean away any residue and check that no filler is deposited on the sleeve O.D. surface.

(continued next page)

SPEEDI-SLEEVE installation instructions

2. Measure shaft diameter in three places.

6. Place installation tool over SPEEDI-SLEEVE.

7. Tap tool to install Sleeve over shaft.

8. Pry flange off installed SPEEDI-SLEEVE.

6. Place installation tool over the sleeve. The flange end of the sleeve goes on the shaft first.

7. Gently tap the center of the tool until the sleeve covers the seal worn surface. If the installation tool supplied with the sleeve is too short, a length of pipe or tubing with a squared-off, burr-free end can be substituted. Use care not to scratch the precision ground sleeve O.D.

8. Leave the flange intact unless clearance is required. If the flange is to be removed, one precut of the flange perpendicular to the tear-off groove will aid in removal. Use heavy-duty side cutters or metal shears. Caution – cut only into the tear-off groove, not on to the finished sleeve surface. After positioning the sleeve, use standard pliers and flex the flange back and forth around its circumference and along the shaft axis. The flange will break loose along tear-off groove. Alternately, pry the flange away from the seal surface and twist it into a coil but take care not to lift the end of the sleeve off the shaft or it will leave a jagged edge. Flange removal must be done with care to avoid damage to sealing surface.

9. After the sleeve is installed, check again for burrs, which could damage the seal.

10. Lubricate the sleeve with the system media when installing the seal.

11. Proceed with the seal installation.

    *Loctite "Quickmetal" (#66010) or similar works well for filling a groove and can be used as an adhesive or sealant if desired. Use of an adhesive can make the removal of the seal difficult.

SKF SPEEDI-SLEEVE removal

A SPEEDI-SLEEVE can be dismounted in one of the following ways: by applying heat to the sleeve; by using a pair of wire cutters starting at or near the flange and applying a twisting action; by "peening" with a small hammer across the full width of the sleeve to expand it or, if accessible, by using a drift on the flange. A SPEEDI-SLEEVE cannot be reused.
