SKF is an international industrial Group operating in some 130 countries and is world leader in bearings.

The company was founded in 1907 following the invention of the self-aligning ball bearing by Sven Wingquist and, after only a few years, SKF began to expand all over the world.

Today, SKF has some 45 000 employees and more than 80 manufacturing facilities spread throughout the world. An international sales network includes a large number of sales companies and some 7 000 distributors and retailers. Worldwide availability of SKF products is supported by a comprehensive technical advisory service.

The key to success has been a consistent emphasis on maintaining the highest quality of its products and services. Continuous investment in research and development has also played a vital role, resulting in many examples of epoch-making innovations.

The business of the Group consists of bearings, seals, special steel and a comprehensive range of other high-tech industrial components. The experience gained in these various fields provides SKF with the essential knowledge and expertise required in order to provide the customers with the most advanced engineering products and efficient service.

How to use this catalogue.

This catalogue will help you to identify the wheel bearing kit you need. One kit is needed for one wheel. In one package you will find the bearing as well as all the relevant accessories such as lock nut, spacers, washer, circlips...

Looking for the right kit

By using the index you can easily find the right page in the catalogue in order to select the correct kit.

Manufacturers and models

Under the heading the name of the manufacturer and various models will appear.

Remarks

Here various items of information will be found, such as chassis numbers, exceptions, type of car, type of shaft, "Drum brakes", "with ABS" and so on.

Wheel bearing kit

This is the designation you should ask for ordering the kit. One kit contains all parts needed when changing a wheel bearing.

Model year

As changes in engine design have arisen, the model year will help to select the right kit.

Front or rear wheel

Make sure that the kit chosen goes with the wheel in question.

Example ▶
Looking for an Opel Ascona-A, follow the left column until the model is found.

After checking there is no restriction on type or model year, you will find the right designation of the **VKBA** kit.

Install Confidence.

OE Quality.

SKF wheel bearings are original equipment on millions of new vehicles worldwide.

Coverage.

SKF covers 95% of the European car parc.

Kit Convenience.

One box, one part number.
Saves time, avoids errors.

Fast, efficient delivery.

The right parts, right when you need them.

The most trusted brand of wheel bearings in the world.

SKF wheel bearings – trusted by more automotive professionals than any other brand in the world.

Over 80 million cars and light trucks in Europe are riding on SKF wheel bearings.

Why? In a word—trust. In fact, no other brand of wheel bearing is trusted more by automotive manufacturers, parts distributors and dealers, mechanics, and by the public itself.

With good reason. SKF technology has been part of the automobile since it was invented, and we've been leading the way ever since—setting the world's standard for quality, and providing the technology needed for new levels of automotive performance and reliability.

Your customers trust you to protect their cars—and their families. We're proud that you've put your trust in SKF wheel bearings.

Wheel end technology for today's cars.

Your customers want to know that you are installing only the best and safest components in their cars. They can feel very confident with SKF.

After all, SKF pioneered the first generation integrated automotive hub unit. And the second, and the third. We introduced “smart” hub units with built-in electronic sensors—including those commonly used with today's ABS, traction control and navigation systems.

SKF has supplied millions of integrated hubs and sensors to automakers around the world, and works in close cooperation with leading automotive manufacturers to continually improve performance, efficiency and reliability.

Product support.

Building the brand through advertising.

SKF maintains a strong presence in automotive trade journals that reach your customers and your customers' customers. This ad reminds garages that installing SKF wheel bearings is good business, because it helps them earn the confidence and loyalty of their customers.

Point-of-sale materials

Point-of-sale materials like this poster for SKF wheel bearing kits help to build sales by reminding your customers and your customers' customers that SKF is the most trusted brand of wheel bearings in the world.

Reliability for your customers

- SKF is the technology leader. We pioneered the first generation integrated automotive hub unit. And the second, and the third. And SKF engineers created the first "smart" hub units with built-in electronic sensors – helping to enhance the safety of today's vehicles with ABS and traction control systems.
- SKF is the quality leader. SKF is the brand most recognized and trusted – from auto manufacturers to installers to the public itself. Consumers prefer premium brands because they get a greater assurance of safety and reliability.

Profitability for your garage

Your customers don't mind paying more for a premium brand they know and trust, which means you make more on the job.

As the graph below shows, SKF wheel bearing kits cost very little more than other kits when the total installed costs are considered.

Cost of part	
Interior brand bearings	Labour
Premium SKF kits	Labour

Only 4-5% more in total cost of job

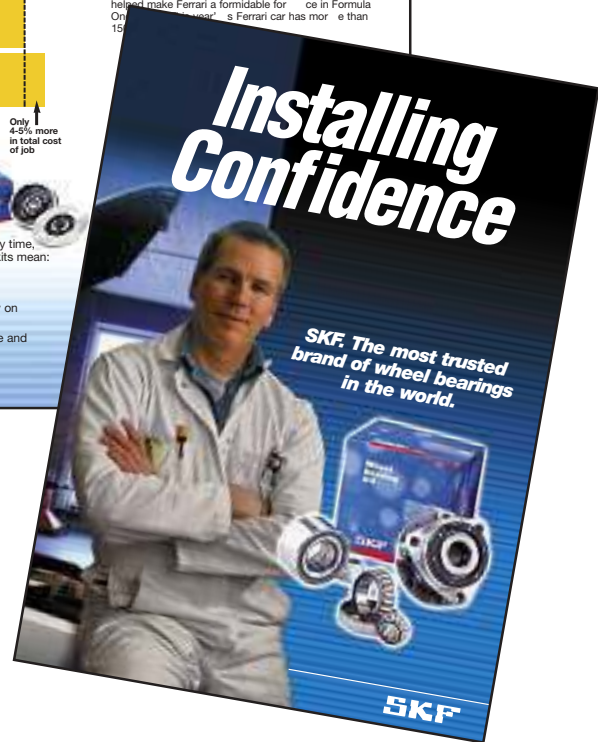

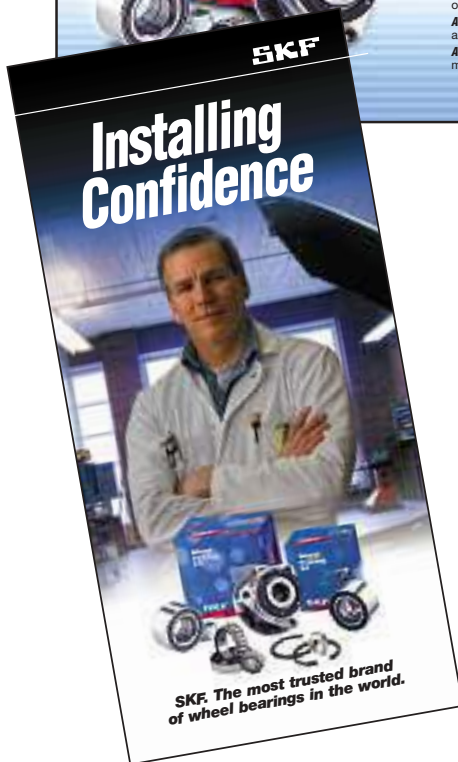

Bearing and brake kits available
For selected applications, SKF offers wheel bearings mounted in replacement brake discs or drums. One box per wheel, with one part number. By assuring a perfect match every time, SKF wheel bearing and brake drum/disc kits mean:

- A faster job** – Fewer parts to locate, order and handle
- A better, safer job** – Same high quality on all replaced parts
- A happier customer** – A more complete and more reliable wheel-end repair
